I. Current District Status

A. Supportive Environment

1. Mission and Vision

a. District Mission Statement

Suwannee County Schools will educate all students in a safe and supportive learning environment that will develop life-long learners and productive citizens.

b. District Vision Statement

Suwannee County School District will be a system of excellence ensuring all students are prepared for personal success.

2. Supports for School Improvement

a. Alignment of Resources

Describe the process through which the district identifies and aligns all district resources (e.g., personnel, instructional, curricular, policy) in order to meet the needs of all students and maximize desired student outcomes. Include the methodology for coordinating and supplementing federal, state and local funds, services and programs to align to interventions in Priority and Focus schools. Provide the person(s) responsible, frequency of meetings, how an inventory of resources is maintained and any problem-solving activities used to determine how to apply resources for the highest impact.

The district administration and staff work closely with school based administration for the purpose of ongoing evaluation of student performance, needs, and resources. The size of the district allows for individualized attention at each of our schools without having to group schools into specific tiers or categories. Data is drilled down from the district to the school level so that resources can be allocated using a district to school problem-solving process. District directors meet with school principals at least monthly, if not more frequently, to discuss needs and progress. Staff and resources are allocated based on both quantitative and qualitative data. Coordination of programs and funding is one benefit of a small district. Multiple programs are supervised by the same individual making coordination and collaboration easier to maintain. When a decision needs to be made regarding two requests that are competing for the same funds, the school demonstrating the highest need for an increase in student achievement and performance will be funded first. Most likely, the other needs will be met at the next possible funding opportunity.

b. School Allocation Process

Describe the way in which the district allocates resources to schools. Include the person(s) responsible for this process, frequency of data review and decision making, and processes used to differentiate and monitor resource supports.

The process varies depending upon the need being assessed. Each school's overall budget is set annually by the CFO after meeting with principals, bookkeepers, and district directors to evaluate the current year's budget expenditures and needs for the following year. The budget is then presented to the Superintendent for feedback and approved by the school board. Each district department is also allocated their budgets in the same manner. As decisions are made regarding staffing, various departments analyze not only student projections in regards to class size but also the educational data for determining the specific needs of the students. Curricular resources are aligned from an elementary and secondary perspective from school to school and are shared for the purpose of correctly aligning the resources to the school/students. This problem-solving process is inclusive of all

departments and school based leaders for the purpose of continual improvement. Initial base amounts of funding are often calculated based on proportional share related to FTE with differentiation taking place based on individual school needs.

c. Modifications to System Policies and Practices

Identify specific policies and practices the district shall seek to add, modify or remove in order to establish or strengthen systems that support school-based leadership teams to implement interventions. Provide the rationale for the proposed changes and the steps required to make the modifications, including person(s) responsible for implementation and follow-up.

The recent development of the 2016-2020 Strategic Plan will guide us regarding priority practices that will be focused upon in the upcoming school year. Many practices will continue and grow such as the focus upon curricular alignment initiatives, building a stronger Human Capital Management System to cultivate and support our most valuable resource - our teachers and staff. Transforming the way of working within the district from working in isolation to working in collaboration is a high priority that was started in the 2015-2016 school year. The district has embraced the concept that the power in being excellent lies in working together to improve ourselves and one another. With the assistance of the Florida Inclusion Network we will continue working through the Best Practices for Inclusion (BPIE) system so to continually evaluate growth opportunities for our students with disabilities. The district has recently employed Teacher Support Colleagues that are working within the Instruction Department for the purpose of supporting not only the curricular and instructional needs of teachers across the district but also for the purpose of expansion as it relates to problem solving process and our practices as it relates to multi-tiered systems of support from the district to the classroom/student level. The district will be focusing on building capacity in all areas that will help provide continuity of programs and stronger, more technical support for schools in need.

d. Operational Flexibility

Provide the district's definition of "operational flexibility" as provided to schools implementing a District-Managed Turnaround option under section 1008.33, Florida Statutes, or a Turnaround, Transformation or Restart with EMO model under the SIG 1003(g) program as it applies to school-level autonomy over staffing, scheduling and budgeting.

In SCSD principals are given operational flexibility in all aspects of the day-to-day operations of their schools. Staffing decisions are made at the site and supported by the district administration. Individual school instructional time schedules are developed by the school principal and approved by the district directors. Each principal has a site-based budget that includes funding for professional development, supplies, instructional materials, etc. Schools truly have a fully comprehensive ability to improve student achievement outcomes and increase graduation rates in their hands. The role of district administration has been defined as support and technical assistance.

3. Sustainability of Improvement

a. Describe how the district will sustain improvements that are a result of the interventions described in Part III of this plan after the schools' Differentiated Accountability designation of Focus or Priority is removed. Include any plans to reorganize personnel, redistribute resources or reach out to community organizations, unions and other partners to build capacity for and sustainability of improvements.

It will be the responsibility of the Assistant Superintendent of Instruction and the Director of Elementary Education to supervise and monitor and coordinate the continued supports needed for students in the schools, and to ensure that principals continue to have the adequate tools needed to carry on the interventions. By proactively planning for K-12 articulation in our district-wide academic plans and intervention maps, students success will be sustainable at the next level. The majority of funds received from funding sources that are short-term will be focused on building district-wide

capacity at all sites and levels. Technical assistance projects with plans such as K12 Reading Plan, Student Progression, HCMS Planning - Evaluation, Recruiting, Retention, and assistance with improving our way of work as a district that will move us to a full Professional Learning Community, will all be costly but long lasting. Once the initial expense is put into developing a strong plan and building a long-term support timeline for the newly updated plans and procedures, the district and schools will be able to sustain the improvements without have annually recurring expenses at the previous level of funding. Funds from short-term sources will be utilized on projects that will make us stronger long-term, for example: higher quality assessments for gathering necessary data to drive instruction, higher quality curriculum maps and lesson plan to provide a guaranteed and viable curriculum to all students, professional development that will improve the way teachers learn - not just what they know - so that the process will continue beyond special funding opportunities.

B. Stakeholder Involvement

1. Parental Involvement Plan (PIP) Link

<https://www.floridacims.org/documents/361938>

2. Family and Community Engagement

Describe the district's *ongoing* mechanisms for engaging families and the community in school improvement efforts.

The district is currently reviewing the District Parent Involvement Plan and the individual school plans which are due to be submitted by October 7, 2016. Those will be uploaded and school board approved in October. The most recent involvement of family and community in school improvement would be the 2016 creation of our Strategic Plan. This process involved a committee of 12 people representing parents, teachers, administration, community members, and students. The process was open to the public and all meetings were held with an audience that could listen and ask questions as the plan was being developed. A town hall style meeting was held to gather input from more of the community regarding goals and strategies that were felt to be beneficial for Suwannee County as a whole. The Strategic Plan itself dictates action items that will be focused upon in the upcoming years to improve parent communication and community involvement. The district is dedicated to being inclusive and transparent with goals, targets and progress being made toward the agreed upon actions. SCSD understands that engaging families and community in school improvement means continually problem-solving to find strategies to increase the involvement and contributions, in both school-based and home-based settings, of parents and community partners that are designed to support classroom instruction and increase student achievement. The district supports and encourages the establishment of organized parent groups, holding public meetings involving parents and community members to review school performance and help develop school improvement plans, using surveys to gauge parent and community satisfaction and support for local public schools, implementing complaint procedures for families, coordinating with local social and health service providers to help meet family needs, and parent education classes (including GED, adult literacy, and ESL programs).

3. Engagement of School Leadership

Describe how the district involves school leadership in the development and implementation of turnaround plans and other school-level interventions.

Regularly monthly meetings are held with district directors and school principals, however that is only the formal interaction regarding implementation of plans and interventions. On a more informal basis, the Director of Elementary Education is in communication with the four elementary principals on a daily basis. Visits to schools and classrooms occur on a regular unscheduled basis. Because discussion is ongoing, when it comes time to create plans and document interventions, the district and school administration are on the same page regarding progress and needs assessment. The Assistant Superintendents of Instruction and Administration are similarly involved in the daily operation of the

secondary schools. Daily communication allows for a well informed district office ready to make needed decisions knowing that the school principals are continually formulating the plans for their schools. One of the benefits of being a small district is the ability to call all stakeholders to the table as necessary. It's not difficult to find a way for all elementary or all secondary principals to meet with district directors when needed, there are only 9 principals in the district.

3. Educator Quality**a. School Leadership Teams**

Describe the process and criteria by which the district determines and ensures each Focus and Priority school has a school leadership team of high quality, including a principal and assistant principal with a record of increasing student achievement in a setting with similar challenges. Include how the district determines whether to retain or replace members of the leadership team.

The district's procedure for ensuring high quality leadership teams is framed by the District's School Based Administrators Performance Appraisal System. The appraisal system's framework is based upon the Florida Principal Leadership Standards, which are the core expectations for effective school administrators. The Standards are based on contemporary research on multi-dimensional school leadership, and represent skill sets and knowledge bases needed in effective schools.

b. Instructional Staff

Describe the process by which the district determines whether to retain or replace members of the teaching staff in Focus and Priority schools whose data shows they have not contributed to improved student outcomes.

The district's procedure for ensuring high quality instructional staff is framed by the District's Instructional Performance Appraisal System. The appraisal system's framework is based upon the core expectations for effective instructional staff. The Standards are based on contemporary research

and represent skill sets and knowledge bases needed in effective schools. The procedure utilizes student performance objectives, as well as professional practice observational data by the principal.

All instructional decisions are made by school principals with the support of the district administration. The final approval of any personnel decision lies in the hands of the Superintendent.

D. Professional Capacity

1. Common Planning Time

Describe how the district ensures appropriate resources are allocated to ensure the master schedule at Focus and Priority schools allows for common planning time, as defined in Rule 6A-1.099811(2)(e), F.A.C.

The district has established that its first fiscal priority is the classroom. Any staffing allocation required for common planning at Focus schools is approved by the Director of Elementary Education and the Director of Human Resources.

2. Instructional Coaches

Describe how the district provides Focus and Priority schools with a reading coach, mathematics coach and science coach to model effective lessons, lead lesson study, analyze data and provide professional development on Florida's standards. Include how the district monitors the daily activities of the coaches and their impact on instruction.

Suwannee Elementary School has an Academic Coach on campus that provides training to teachers in the given areas. The Academic Coach works closely with the School Administration, Director of Elementary Education, District Math Coach, and District Teacher Support Colleagues (Reading Specialist, Science Specialist, STEM Specialist). All coaches keep a log of activities that is kept at the school and reviewed by school and district administration.

Suwannee Intermediate School also has an Academic Coach on campus and the same district support.

E. Ambitious Instruction and Learning

2. Instructional Alignment and Pacing**a. Program Monitoring**

Describe the process through which the district monitors whether core instructional and intervention programs are implemented as intended, how alignment with Florida's standards is maintained and whether they are effective. Include the data used to determine fidelity and effectiveness. Provide exemplars of how the district has responded to evidence of poor implementation and evidence that a given strategy is failing to reduce barriers to goals.

Monitoring is done by observation of practice and analysis of student data at the classroom, school, and district levels. Documentation is provided monthly to support the time principals and assistant principals spend in classrooms gathering observational data. Currently the district is closely monitoring the implementation of the Language for Learning programs at the early grades. The Assistant Superintendent of Instruction, Director of Elementary Education, and the School Principals are working together to make sure that all children needing to be served by the program are receiving the benefit of resources.

b. Supports for Student Transitions

Describe the structures the district has in place to support students in Focus and Priority schools as they transition from one school to another.

1. Will the district use its Student Progression Plan to satisfy this question?

Yes

a. Link to Student Progression Plan
