The 2014-15 school grades serve as informational baseline data that schools can use to improve in future years.

### School Board Approval

This plan was approved by the Pasco County School Board on 10/18/2016.

### SIP Authority and Template

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a school improvement plan (SIP) for each school in the district.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F or a monitoring status of "Former F" (see page 4). For all other schools, the district may use a template of its choosing. All districts must submit annual assurances that their plans meet statutory requirements.

This document was prepared by school and district leadership using the Florida Department of Education's school improvement planning web application located at <https://www.floridacims.org>.

## Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. A corollary at the district level is the District Improvement and Assistance Plan (DIAP), designed to help district leadership make the necessary connections between school and district goals in order to align resources. The Florida Department of Education encourages schools to use the SIP as a “living document” by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the “Date Modified” listed in the footer.

### Part I: Current School Status

Part I organizes the current status of the school around five domains inspired by the 5Essentials framework: Supportive Environment, Family and Community Involvement, Effective Leadership, Public and Collaborative Teaching, and Ambitious Instruction and Learning. Questions regarding the school’s Multi-Tiered System of Supports have been embedded throughout this part to demonstrate how data is used by stakeholders to understand the needs of all students and allocate appropriate resources in proportion to those needs.

### Part II: Needs Assessment

Part II requires the school to review performance and early warning systems data in order to develop strategic goals and associated data targets (i.e., “SMART goals”) for the coming school year in context of the school’s greatest strengths and needs. An online tool was developed, which includes data visualizations and processing questions to support problem identification, problem analysis and strategic goal formulation.

### Part III: 8-Step Planning and Problem Solving for Implementation

Part III enables the school to develop implementation plans for its highest-priority goals. With the overview of the current state of the school in mind and the strategic goals identified through the needs assessment, the planning team engages in a facilitated planning and problem-solving process, through which they

- Define strategic goals and establish targets to be reached by successfully achieving the goals (Step 1)
- Identify barriers that could hinder achieving those goals and resources that could be used to eliminate or reduce barriers (Step 2)
- Select high-priority barriers they want to address initially (Step 3)
- Design implementation and monitoring plans for strategies to resolve selected barriers (Steps 4-7)
- Determine how they will monitor progress toward each goal (Step 8)

### Appendices

The following appendices, automatically-generated from content entered in Part III, are included in this document:

- Appendix 1 is a timeline of all action steps and monitoring activities
- Appendix 2 is an outline of all professional development opportunities and technical assistance items
- Appendix 3 is a report of the budget needed to implement the strategies

## Differentiated Accountability

Florida's Differentiated Accountability (DA) system, established in [section 1008.33, Florida Statutes](#), is a statewide network of strategic support, differentiated by need according to performance data, provided to districts and schools in order to improve leadership capacity, teacher efficacy, and student outcomes. Through a data-driven planning and problem-solving process, DA field teams collaborate with district leadership to design, implement, and refine strategic goals and action plans that are documented in the SIP.

### DA Regions

Florida's DA network is divided into four geographical regions, each served by a field team led by a regional executive director (RED).

### DA Categories

At the start of each academic year, traditional schools are classified for DA support in three categories based on the most recent school grades data available. Descriptions of each DA category along with the state support and interventions provided are set forth by [Rule 6A-1.099811, Florida Administrative Code](#):

- Not in DA – currently A, B, or C and not Monitoring Only; charter schools; ungraded schools
- Monitoring Only – currently A, B, or C that improved from a previous grade of F
- Focus – currently D
- Priority – currently F

### DA Turnaround and Monitoring Statuses

Additionally, schools in DA may be subject to a turnaround status of "Planning" or "Implementing" or a monitoring status of "Former F." These statuses are based on a school's grades history, including the current school grade:

- Former F - A school with a status of "Former F" requires the department to monitor the implementation of strategies and progress toward the goals outlined in the school improvement plan for three years following the school's improvement from a grade of F to a C or higher.
- Planning - A school with a status of "Planning" requires the district to engage stakeholders in the development of a turnaround option plan to be implemented in the following year should the school grade not improve to a C or higher.
- Implementing - A school with a status of "Implementing" requires the district to submit a turnaround plan to the State Board of Education for approval and implementation. A school remains in "Implementing" status until its school grade improves to a C or higher.

## I. Part I: Current School Status

### A. Supportive Environment

#### 1. School Mission and Vision

##### a. Provide the school's mission statement.

Our mission at Ridgewood High School is to prepare students for college, career, and life readiness by building foundational skills and providing opportunities and supports for acceleration.

##### b. Provide the school's vision statement.

All our students achieving success in college, career, and life

#### 2. School Environment

##### a. Describe the process by which the school learns about students' cultures and builds relationships between teachers and students.

All students are enrolled in a 2nd period Advisory Session, Homeroom. During that time, students engage in lessons 2 times monthly focused on our core values G.R.I.T. (Growth, Resilience, Integrity, Tenacity). The time affords us the opportunity to design and implement lessons to meet the needs of our unique population. Also, the 2nd period teacher is assigned as the mentor for the students in their class. We have deliberately kept class size numbers low by having all teachers on campus teach a second period. No one has planning during that time on our campus. Also, 2 times each month students are able to participate in clubs and organizations. We have a variety of club offerings so that everyone has something they can participate in.

##### b. Describe how the school creates an environment where students feel safe and respected before, during and after school.

During the 2nd period Advisory Session, we will develop and implement classroom lessons to help promote a safe school and build pro-social behaviors in our students.

##### c. Describe the schoolwide behavioral system in place that aids in minimizing distractions to keep students engaged during instructional time. This may include, but is not limited to, established protocols for disciplinary incidents, clear behavioral expectations, and training for school personnel to ensure the system is fairly and consistently enforced.

One of our goals is to decrease the loss of instructional time. Students participated in the development of our core values during one of the first Advisory Sessions. These positive expectations are taught and reinforced throughout the school year. We also use alternatives to suspension in order to reduce In School and Out of School Suspension times. We have a system of positive behavior support that has been in place for many years. Students earn RAMS Rewards by positively following school rules and procedures. We use a digital system called HERO in order to help students keep track of their points. They can download a free application on their device to track points and also tardies and resulting consequences. This has helped to increase communication and reinforcement of positives and policies/procedures.

##### d. Describe how the school ensures the social-emotional needs of all students are being met, which may include providing counseling, mentoring and other pupil services.

Our Student Services Department meets in Student Success Teams to problem solve the needs of their assigned cohort. The team is made of a School Counselor, Graduation Coach, and Assistant Principal. Student data is reviewed in 3 week cycles to assess On Track, At Risk, and Off Track

indicators for student success. Teams look at data for behavior, attendance, current course performance, credits, and GPA to determine which students are in need of tiered supports. Students in need of Tier 2 supports, are served by the School Counselor to provide Social Emotional Support for attendance and behavior. Monthly, the entire Student Services Department meetings to discuss students in need of Tier 3 supports who can be supported by our Tier 3 Graduation Coach. We also review this population of students to prioritize needs for School Based Intervention Team meetings to problem solve and development intensive intervention plans for struggling students. During these meeting, the Social Worker is frequently designated to provided one to one solution focused counseling. Our entire Student Services structure is designed to provide social emotional counseling in a proactive manner, as well as academic coaching to proactively support students.

## Action Plan for Improvement

*For each strategy selected in the plan to reduce a targeted barrier to a strategic goal, this section lists the rationale for that strategy (i.e., why the school believes it will reduce the barrier) and the action steps that have been identified as necessary to implementing the strategy, including details such as the point person, timing and duration, and evidence of completion. At the end of each set of action steps is the plan for monitoring the implementation and effectiveness of the respective strategy.*

 B220958

**G1.B2.S1** Through the development and implementation of a character education program and a system of positive behavior supports, we will increase pro-social behaviors. **4**

 S233296

**Strategy Rationale**

On a school-wide level, PBS relies on accurate and reliable discipline referral data to understand the behaviors occurring across campus. An analysis of the data allows a school team to identify the problem areas, brainstorm interventions such as where and what to teach, reward the students exhibiting the expected behavior, and communicate findings to the staff, students, and families. The PBS process is a team-based approach that relies on a strong collaboration between families and professionals from a variety of disciplines regardless of the level implemented.

 G083380

**G2.B1** PLC implementation needs to be strengthened. **2**

 B220960

**G2.B1.S1** PLCs will have common planning time to engage in the PLC cycle. PLCs will collect common formative assessment data to make instructional decisions. **4**

 S233298

### Strategy Rationale

A trio of researchers conducted a study of the teaching staffs in 24 schools to determine elements that contributed to the formation of strong professional learning communities (PLCs) and identified collaboration time as the most powerful factor, explaining 70 percent of the variation between schools in their relative strength of PLCs (Louis, et al, 1996). Separate research has found that in schools with well-developed PLCs students performed better in reading, math, science and history (Newman & Wehlage, 1995).

The PLC focus on results leads each team to develop and pursue measurable improvement goals that are aligned to school and district goals for learning. It also drives teams to create a series of common formative assessments that are administered to students multiple times throughout the year to gather ongoing evidence of student learning. Team members review the results from these assessments in an effort to identify and address program concerns (areas of learning where many students are experiencing difficulty). They also examine the results to discover strengths and weaknesses in their individual teaching in order to learn from one another.

Most importantly, the assessments are used to identify students who need additional time and support for learning. Frequent common formative assessments represent one of the most powerful tools in the PLC arsenal (Dufour, Dufour, Eaker & Many, 2006).

### Action Step 1 **5**

Teachers will meet weekly in PLC meetings to engage in the PLC cycle. Teachers will meet with their PLC for half day planning and professional development sessions each quarter. The sessions will focus on prioritized needs of the PLC and the students they serve.

**G2.B2** Instruction needs to be student centered. **2**

 B220961

**G2.B2.S1** Professional development will be focused on student centered instructional strategies. **4**

 S233299

**Strategy Rationale**

Student-centered teaching methods shift the focus of activity from the teacher to the learners. These methods include active learning, in which students solve problems, answer questions, formulate questions of their own, discuss, explain, debate, or brainstorm during class; cooperative learning, in which students work in teams on problems and projects under conditions that assure both positive interdependence and individual accountability; and inductive teaching and learning, in which students are first presented with challenges (questions or problems) and learn the course material in the context of addressing the challenges. Inductive methods include inquiry-based learning, case-based instruction, problem-based learning, project-based learning, discovery learning, and just-in-time teaching. Student-centered methods have repeatedly been shown to be superior to the traditional teacher-centered approach to instruction, a conclusion that applies whether the assessed outcome is short-term mastery, long-term retention, or depth of understanding of course material, acquisition of critical thinking or creative problem-solving skills, formation of positive attitudes toward the subject being taught, or level of confidence in knowledge or skills. (Felder at NCSU, 2016)

**Action Step 1** **5**

The first LATIC cohort will engage in ongoing professional development to transition their classrooms to student centered learning environments. We will also model professional development in the LATIC format to help expose all teachers to this. Cohort 1 teachers will also help model this during faculty PD.

**G2.B3** Problem solving for each cohort of students is needed. 2

B220962

**G2.B3.S1** Student Success Teams will engage in problem solving for each cohort. 4

S233300

**Strategy Rationale**

This data-based problem-solving approach to integrate academic and behavior instruction and intervention will include ensuring instruction/interventions are standards-based and data are used to differentiate instruction. The integrated instruction and intervention is delivered to students in varying intensities (multiple tiers) based on student need. "Need-driven" decision-making seeks to ensure that school resources reach the appropriate students at the appropriate levels to accelerate the performance of ALL students to achieve and/or exceed proficiency.

B220963

**G2.B4.S1** Teachers will engage students in strategies to track their academic progress. 4

S233301

S233304

### Strategy Rationale

It may be one of the least controversial statements in American education: Parent involvement can make a difference in a child's education. Two-thirds of teachers surveyed (Public Agenda, 2003) believed that their students would perform better in school if their parents were more involved in their child's education, while 72% of parents say children of uninvolved parents sometimes "fall through the cracks" in schools (Johnson & Duffett, 2003).
