School Board Approval

This plan is pending approval by the Lake County School Board.

SIP Authority and Template

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a school improvement plan (SIP) for each school in the district.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F or a monitoring status of "Former F" (see page 4). For all other schools, the district may use a template of its choosing. All districts must submit annual assurances that their plans meet statutory requirements.

This document was prepared by school and district leadership using the Florida Department of Education's school improvement planning web application located at <https://www.floridacims.org>.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. A corollary at the district level is the District Improvement and Assistance Plan (DIAP), designed to help district leadership make the necessary connections between school and district goals in order to align resources. The Florida Department of Education encourages schools to use the SIP as a “living document” by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the “Date Modified” listed in the footer.

Part I: Current School Status

Part I organizes the current status of the school around five domains inspired by the 5Essentials framework: Supportive Environment, Family and Community Involvement, Effective Leadership, Public and Collaborative Teaching, and Ambitious Instruction and Learning. Questions regarding the school’s Multi-Tiered System of Supports have been embedded throughout this part to demonstrate how data is used by stakeholders to understand the needs of all students and allocate appropriate resources in proportion to those needs.

Part II: Needs Assessment

Part II requires the school to review performance and early warning systems data in order to develop strategic goals and associated data targets (i.e., “SMART goals”) for the coming school year in context of the school’s greatest strengths and needs. An online tool was developed, which includes data visualizations and processing questions to support problem identification, problem analysis and strategic goal formulation.

Part III: 8-Step Planning and Problem Solving for Implementation

Part III enables the school to develop implementation plans for its highest-priority goals. With the overview of the current state of the school in mind and the strategic goals identified through the needs assessment, the planning team engages in a facilitated planning and problem-solving process, through which they

- Define strategic goals and establish targets to be reached by successfully achieving the goals (Step 1)
- Identify barriers that could hinder achieving those goals and resources that could be used to eliminate or reduce barriers (Step 2)
- Select high-priority barriers they want to address initially (Step 3)
- Design implementation and monitoring plans for strategies to resolve selected barriers (Steps 4-7)
- Determine how they will monitor progress toward each goal (Step 8)

Appendices

The following appendices, automatically-generated from content entered in Part III, are included in this document:

- Appendix 1 is a timeline of all action steps and monitoring activities
- Appendix 2 is an outline of all professional development opportunities and technical assistance items
- Appendix 3 is a report of the budget needed to implement the strategies

Differentiated Accountability

Florida's Differentiated Accountability (DA) system, established in [section 1008.33, Florida Statutes](#), is a statewide network of strategic support, differentiated by need according to performance data, provided to districts and schools in order to improve leadership capacity, teacher efficacy, and student outcomes. Through a data-driven planning and problem-solving process, DA field teams collaborate with district leadership to design, implement, and refine strategic goals and action plans that are documented in the SIP.

DA Regions

Florida's DA network is divided into four geographical regions, each served by a field team led by a regional executive director (RED).

DA Categories

At the start of each academic year, traditional schools are classified for DA support in three categories based on the most recent school grades data available. Descriptions of each DA category along with the state support and interventions provided are set forth by [Rule 6A-1.099811, Florida Administrative Code](#):

- Not in DA – currently A, B, or C and not Monitoring Only; charter schools; ungraded schools
- Monitoring Only – currently A, B, or C that improved from a previous grade of F
- Focus – currently D
- Priority – currently F

DA Turnaround and Monitoring Statuses

Additionally, schools in DA may be subject to a turnaround status of "Planning" or "Implementing" or a monitoring status of "Former F." These statuses are based on a school's grades history, including the current school grade:

- Former F - A school with a status of "Former F" requires the department to monitor the implementation of strategies and progress toward the goals outlined in the school improvement plan for three years following the school's improvement from a grade of F to a C or higher.
- Planning - A school with a status of "Planning" requires the district to engage stakeholders in the development of a turnaround option plan to be implemented in the following year should the school grade not improve to a C or higher.
- Implementing - A school with a status of "Implementing" requires the district to submit a turnaround plan to the State Board of Education for approval and implementation. A school remains in "Implementing" status until its school grade improves to a C or higher.

I. Part I: Current School Status

A. Supportive Environment

1. School Mission and Vision

a. Provide the school's mission statement.

Our mission is to provide a safe environment that cultivates and develops student skills leading to mastery of rigorous state standards. "We will Build Student Excellence by Finding the Hidden Gift in Each Child"

b. Provide the school's vision statement.

Beverly Shores Elementary will be a model school where each and every student will be equipped and prepared for the next level of education at the end of each school year.

2. School Environment

a. Describe the process by which the school learns about students' cultures and builds relationships between teachers and students.

Teachers and staff build a relationship with students by greeting them each morning on the sidewalk with a smile. Our goal is for our students to always feel welcomed and valued. Each classroom is built to ensure classes are diverse and well-balanced. We offer student clubs that foster relationship building between students and sponsoring staff members that include K-Kids, Robotics, Stem Bowl, Chorus, Photography/Art, and Journalism.

b. Describe how the school creates an environment where students feel safe and respected before, during and after school.

All students whom enter the school before 8:20 report to the cafeteria. They are held there until each grade level is dismissed, in an orderly fashion. The teachers provide supervision by being at their doors and greeting students as they arrive to class each morning. During the school day students know they are to stay on the blue line as they pass on the sidewalk. After school, we dismiss car riders, bike riders, and E.L.C. with their respected staff members. Buses and day cares are also dismissed as they arrive. It is our intent to follow all safe school procedures throughout the entire school day.

Beverly Shores reinforces respectful behavior on a daily basis. One example of this is reflected in our culture of common area transitions on the blue lines. Students are taught to yield to students to the right if blue lines intersect at hallways. Additionally, students are rewarded with "PRIDE Bucks" that can be cashed in for rewards through our PBS program. They earn these bucks when observed showing respectful behavior or apologizing for inappropriate behavior without prompting. We have adopted a single school culture of behavioral expectations where respect for self, peers, adults, and our school campus is embedded.

c. Describe the schoolwide behavioral system in place that aids in minimizing distractions to keep students engaged during instructional time. This may include, but is not limited to, established protocols for disciplinary incidents, clear behavioral expectations, and training for school personnel to ensure the system is fairly and consistently enforced.

PBS is in place to provide teachers with a system that will help keep students on task in the classroom and outside the classroom. Beverly Shores Elementary promotes positive reinforcement with "Pride Bucks". Teachers also use a color code system that allows parents to see the color in

their student's agenda and know if they had a good day, mediocre day or hard day. All teachers and staff have added Class Dojo, an online program that provides students with immediate feedback and aligns to a school-wide color code system. Students are expected to treat all teachers and staff members with respect at all times. Teachers and staff also know that administrators are available when disciplinary protocols need to be addressed.

Beverly Shores Elementary has developed a discipline ladder to address inappropriate behaviors. In all cases, every effort will be made to contact parents by phone when a student has a discipline issue. With the exception of zero tolerance or other sudden, extreme issues, the administration of B.S.E. will address office referrals on an escalating scale of consequences.

Beverly Shores Elementary has a character development team comprised of (2) Potential Specialists, (2) Guidance Counselors, an Instructional Dean, and a Character Development Teacher.

d. Describe how the school ensures the social-emotional needs of all students are being met, which may include providing counseling, mentoring and other pupil services.

Beverly Shores Elementary takes a holistic approach in educating the whole child through a student B.A.S.E.D.(Behavioral, Academic, Social, Emotional, Development) approach and has a number of resources to offer our students:

Character Development Teacher (CDT)
Potential Specialist (K-2, 3-5)
School mentoring program (Bows & Bowties, Ladies & Lab Coats)
School Ambassadors program (K-Kids)
Children's Clinical On-Site (CCOS) Counselors
Family School Liaison (FSL)

a. Describe the school's early warning system and provide a list of the early warning indicators used in the system.

Beverly Shores uses the DecisionEd data base system to monitor Early Warning Systems. Currently we are monitoring the following reporting areas:

1. Year-to-Date Attendance reports focusing on specified "Targeted Groups" (0-80% Attendance Rate)
2. Year-to-Date Infraction Counts by Grade Levels (With identified students)
3. Infraction Analysis Reports by Month (with three year trends)
4. Year-to-Date Suspension Reports (With identified students)

These reports are pulled at each marking period and reviewed with the Leadership team and school social worker and psychologist as well. These reports are also used to complete MTSS analysis reports for determination of Core Tier 1 adjustments or recommendations for Tier 2 Behavior referrals on an individual student basis. This data is also used for the Tier 3 analysis review which are required to prepare for case reviews.

b. Provide the following data related to the school's early warning system

Tier 1 will be monitored by the classroom teacher during core instruction and data collected from I-Station, i-Ready, Science mini assessments, LBAs, LSAs and Formative assessments.

Teachers will receive support from instructional coaches and the CRT. Monthly data chats will be held to discuss and analyze student data. Teachers will provide artifacts that show alignment with standards based instruction. To improve the fidelity of writing instruction in response to text across all content areas teachers will work with instructional coaches to create exemplars to be used to calibrate the scoring of student writing.

The Title I plan and budget were developed based on the needs outlined in the School Improvement Plan. School personnel who are funded through Title I will focus on meeting these needs (Literacy Coach, Potential Specialists, Family School Liaison and Teacher Assistants). The district and school coordinate Title I services for educational services and staff development. The district-based Migrant Liaison provides services and support as needed to qualifying students and parents. The district receives funds for students in need of neglected and delinquent services. The district receives funds for technology to enhance instructional strategies as well as also funding for professional development. The district curriculum department provides services for educational materials and support for ELL students. Each grade level representative will serve as a liason between the LLT and their team.

D. Public and Collaborative Teaching

The school's response to this section may be used to satisfy the requirements of 20 U.S.C. Â§ 6314(b)(1)(D).

1. Describe the school's strategies to encourage positive working relationships between teachers, including collaborative planning and instruction.

Our strategy to encourage positive working relationship among our teachers includes many components. The foundation is built upon designing the master schedule to provide common planning for grade levels KG - 5th. We also have departmentalized our 3rd, 4th and 5th grade level teams giving those instructors the ability to develop deeper mastery of their chosen content areas. This structure gives us the ability to have grade level and content specific curriculum meetings on a weekly basis facilitated by our instructional coaches. Additionally, we are able to work with instructors that need additional assistance with instructional delivery or classroom environment development. These systems help to develop collaborative teachers that demonstrate a mastery of the content. This includes a plan for gradual release and assessment that is ultimately focused on providing individualized instruction based on student needs.

2. Describe the school's strategies to recruit, develop and retain highly qualified, certified-in-field, effective teachers to the school.

Teacher Quality and Retention (TQR) and New Teacher Coach will continue attending district meetings to provide information and support for newer teachers. The Literacy Coach and the CRT will provide training to new teachers regarding all aspects of curriculum and assessment. Professional Learning Communities and Grade Level Common Planning will be monitored by Administration, CRT, and Instructional Coaches to provide education and support for all teachers. Grade level meetings will provide ongoing training, data analysis and support services for new teachers. We will also work at strengthening our relationships with surrounding colleges and universities to secure interns for their junior and senior internships. The individuals who will be responsible are the Principal, Assistant Principal, CRT and Instructional Coaches.

3. Describe the school's teacher mentoring program, including the rationale for pairings and planned mentoring activities.

District New Teacher Coaches will support New Teachers with zero years of experience district-wide. School-based New Teacher Coaches will participate in the on-going professional development for coaching and mentoring. The New Teacher Coach with support from the TQR will facilitate a new teacher PLC (New Teacher Academy) to provide support in curriculum, resources, school procedures, campus non-negotiables, development of a deliberate practice plan and other concerns as needed.

All participants in the New Teacher Academy have been paired with a mentor or buddy on a different grade level. The rationale behind this was to provide them with the opportunity be available to visit each other's classrooms for observations and modeling.

E. Ambitious Instruction and Learning

1. Instructional Programs and Strategies

a. Instructional Programs

1. Describe how the school ensures its core instructional programs and materials are aligned to Florida's standards.

Our school establishes continuous opportunities for teachers to utilize the Florida Standards and to collaborate and converse together in regards to reading and writing curriculum so that it aligns to the standards. This develops a more profound level of comprehension. These exchanges and learning opportunities advance dialogue that can eliminate confusion and misconceptions while simultaneously advancing opportunities for success and growth in instructional practice, curriculum, and the standards. The use of common planning, Kagan strategies, and the universal use of Thinking Maps contribute to this endeavor.

All content area instruction, kindergarten through 5th grade, is directly correlated to the current Florida Standards. The adopted curricula supply a portion of the needed research based resources that are necessary for success in combination with links to additional research based resources that are evident on the county blueprints such as CPALMs.

Our school creates ongoing opportunities during common planning for teachers to discuss and unpack the Florida Standards and also to plan and discuss the curriculum that aligns to the standards. This supports a deeper level of understanding. These conversations and learning opportunities promote dialogue that can dispel misunderstandings and promote opportunities for growth in instructional practice, curriculum, and the standards.

School administration will be a part of common planning and curriculum meetings to ensure planning is aligned with the new Florida Standards.

b. Instructional Strategies

1. Describe how the school uses data to provide and differentiate instruction to meet the diverse needs of students. Provide examples of how instruction is modified or supplemented to assist students having difficulty attaining the proficient or advanced level on state assessments.

The use of Kagan Cooperative Structures is evident across the campus and ensures that there is continual differentiated instruction. Kagan is researched based and combines not only instructional support but also methods for grouping students in teams while considering their learning styles, current levels, and needs.

All teachers will utilize student data to set flexible groups for differentiated instruction. Students will also have an opportunity to utilize I-Station and i-Ready which provide individualized learning for

students based on their skill deficiencies and strengths.

Fifth grade teachers utilize Science mini-assessments to monitor student progress on current science standards.

2. Provide the following information for each strategy the school uses to increase the amount and quality of learning time and help enrich and accelerate the curriculum:

Strategy: After School Program

Minutes added to school year: 1,800

Title I funds will be used to develop and run the after school tutoring program for grades 3-5 at Beverly Shores Elementary

Strategy Rationale

With the amount of under resourced learners at Beverly Shores Elementary, having an after school tutoring program is essential in ensuring student growth and success. Facilitating an after school program offers the additional assistance many families are unable to provide.

Strategy Purpose(s)

- Core Academic Instruction

Person(s) responsible for monitoring implementation of the strategy

Grable, Vicky , grablev@lak.k12.fl.us

Data that is or will be collected and how it is analyzed to determine effectiveness of the strategy

Students will be given a pre-assessment and post-assessment to measure student growth. In addition, class assessments and unit assessments will be used to continually progress monitor students in the tutoring program. This data will be used to help differentiate student instruction during the tutoring program.

2. Student Transition and Readiness

a. PreK-12 Transition

The school's response to this question may be used to satisfy the requirements of 20 U.S.C. Â§ 6314(b)(1)(G).

1. Describe the strategies the school employs to support incoming and outgoing cohorts of students in transition from one school level to another.

Local preschools, Head Start, and day cares are welcome to visit our campus. Many bring their prospective kindergartners for a school and classroom tour in the spring. A Kindergarten Round-up is scheduled every spring to register students and provide vital information for prospective kindergartners and their parents.

Florida's Kindergarten Readiness Screening instrument is administered in the fall to document student readiness. The tests are submitted to the state for results to be reported at a later date.

School volunteers assist kindergarten teachers throughout the school year, especially in the beginning of the year. Volunteers provide extra attention to students who are experiencing transitional difficulties.

The “transition” from preschool to kindergarten begins with diagnostic evaluations including Literacy First. Students are given FLKRS and FAIR to determine readiness for kindergarten skill development. The data is then used to drive the instruction.

Students in grades kindergarten through fourth are transitioned through the use of data cards that contain testing information, attendance data, identify special programs, and have anecdotal notes for the future teacher. We additionally have added an end of year articulation process for our students being progressed monitored through MTSS as well.

Fifth grades are given the opportunities to visit our feeder middle schools in the 2nd semester. The 5th grade teachers identify students for various middle school programs.

b. College and Career Readiness

1. Describe the strategies the school uses to advance college and career awareness, which may include establishing partnerships with business, industry or community organizations.

Beverly Shores Elementary has a College and Career Readiness Week. It includes a career week where students discuss careers that extend to a writing artifact and is displayed school-wide. We incorporate community partnerships by inviting speakers on a designated day to come and speak about their careers.

2. Identify the career and technical education programs available to students and industry certifications that may be earned through those respective programs.

3. Describe efforts the school has taken to integrate career and technical education with academic courses (e.g., industrial biotechnology) to support student achievement.

4. Describe strategies for improving student readiness for the public postsecondary level based on annual analysis of the [High School Feedback Report](#), as required by section 1008.37(4), Florida Statutes.

II. Needs Assessment

The school's completion of this section may satisfy the requirements of 20 U.S.C. Â§ 6314(b)(1)(A).

A. Problem Identification

1. Data to Support Problem Identification

b. Data Uploads

Data uploads are not required by the Florida Department of Education but are offered as a tool for the needs assessment. In this section, the school may upload files of locally available data charts and graphs being used as evidence of need.

The following documents were submitted as evidence for this section:
