### School Board Approval

This plan is pending approval by the Sumter County School Board.

### SIP Authority and Template

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a school improvement plan (SIP) for each school in the district that has a school grade of D or F.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F (see page 4). For schools receiving a grade of A, B, or C, the district may opt to require a SIP using a template of its choosing.

This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at <https://www.floridacims.org>.

## Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. A corollary at the district level is the District Improvement and Assistance Plan (DIAP), designed to help district leadership make the necessary connections between school and district goals in order to align resources. The Florida Department of Education encourages schools to use the SIP as a “living document” by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the “Date Modified” listed in the footer.

### Part I: Current School Status

Part I organizes the current status of the school around five domains inspired by the 5Essentials framework: Supportive Environment, Family and Community Involvement, Effective Leadership, Public and Collaborative Teaching, and Ambitious Instruction and Learning. Questions regarding the school’s Multi-Tiered System of Supports have been embedded throughout this part to demonstrate how data is used by stakeholders to understand the needs of all students and allocate appropriate resources in proportion to those needs.

### Part II: Needs Assessment

Part II requires the school to review performance and early warning systems data in order to develop strategic goals and associated data targets (i.e., “SMART goals”) for the coming school year in context of the school’s greatest strengths and needs. An online tool was developed, which includes data visualizations and processing questions to support problem identification, problem analysis and strategic goal formulation.

### Part III: 8-Step Planning and Problem Solving for Implementation

Part III enables the school to develop implementation plans for its highest-priority goals. With the overview of the current state of the school in mind and the strategic goals identified through the needs assessment, the planning team engages in a facilitated planning and problem-solving process, through which they

- Define strategic goals and establish targets to be reached by successfully achieving the goals (Step 1)
- Identify barriers that could hinder achieving those goals and resources that could be used to eliminate or reduce barriers (Step 2)
- Select high-priority barriers they want to address initially (Step 3)
- Design implementation and monitoring plans for strategies to resolve selected barriers (Steps 4-7)
- Determine how they will monitor progress toward each goal (Step 8)

### Appendices

The following appendices, automatically-generated from content entered in Part III, are included in this document:

- Appendix 1 is a timeline of all action steps and monitoring activities
- Appendix 2 is an outline of all professional development opportunities and technical assistance items
- Appendix 3 is a report of the budget needed to implement the strategies

## Differentiated Accountability

Florida's Differentiated Accountability (DA) system, established in [section 1008.33, Florida Statutes](#), is a statewide network of strategic support, differentiated by need according to performance data, provided to districts and schools in order to improve leadership capacity, teacher efficacy, and student outcomes. Through a data-driven planning and problem-solving process, DA field teams collaborate with district leadership to design, implement, and refine strategic goals and action plans that are documented in the SIP.

### DA Regions

Florida's DA network is divided into four geographical regions, each served by a field team led by a regional executive director (RED).

### DA Categories

At the start of each academic year, traditional schools are classified for DA support in two categories based on the most recent school grades data available. Descriptions of each DA category along with the state support and interventions provided are set forth by [Rule 6A-1.099811, Florida Administrative Code](#):

- **Not in DA** - A school with a current school grade of A, B, or C; charter schools; and ungraded schools.
- **Targeted Support and Improvement** - A school with a current school grade of an initial D.
- **Comprehensive Support and Improvement** - A school with a current school grade of F or two consecutive grades of D, or a high school with a graduation rate of 67 percent or less in the most recent data release.

### DA Turnaround Status

Additionally, Comprehensive Support and Improvement schools have a turnaround status of "Implementing," based on a school's grades history, including the current school grade:

- Implementing - A school with a status of "Implementing" requires the district to submit a turnaround plan to the State Board of Education for approval and implementation. A school remains in "Implementing" status until its school grade improves to a C or higher.

## I. Part I: Current School Status

### A. Supportive Environment

#### 1. School Mission and Vision

##### a. Provide the school's mission statement.

Wildwood Middle High School will provide a positive educational environment that promotes maximum learning opportunities through academic training and life experiences cultivated by the efforts of students, parents, faculty, and business partners.

##### b. Provide the school's vision statement.

All Means All

#### 2. School Environment

##### a. Describe the process by which the school learns about students' cultures and builds relationships between teachers and students.

Wildwood Middle High School learns about students' cultures through review of student cumulative folders, student contact forms, and discussions with the community. Relationships between the staff and students are built through frequent communication, beginning of the year "Get to Know You" activities, personal conversations with students during non-instructional time such as lunch and break, Wildcat Connection and participation in extra-curricular activities to support student talented ability. Teachers are also encouraged to become familiar with the students' academic background by reviewing test scores, grades from previous school years, conversations with former teachers, and pertinent information linked with student background.

Also, many staff members live in or are from the Wildwood community and are therefore familiar with the background of the students.

##### b. Describe how the school creates an environment where students feel safe and respected before, during and after school.

The priority of Wildwood Middle High School is to establish and maintain safety of all individuals who are involved on WMHS campus. To ensure that all members on campus are safe, safety policies and procedures have been established for all members to follow. At the beginning of the school year, students are provided with a copy of the Student Handbook and Student Code of Conduct that detail information about the school safety policies, procedures, expectations and discipline plan. The Student Handbook and Student Code of Conduct are reviewed in detail each period on the first day of school. The administrators also meet with students during the first week of school to review school wide expectations.

Wildwood Middle High School also creates an environment where students feel safe and respected by ensuring that there is always supervision. Teachers are stationed at varying posts around the school to supervise before school, during student transition time, lunch time and after school. Throughout the day, administrators and the School Resource Officer are visible and monitor the campus to ensure all students are safe. During after school, the faculty member in charge of the activity supervises participants. Administrators are also assigned to supervise sporting and other events held after school hours.

Students also have the opportunity to express their concerns to any staff member on campus whom they trust or utilize the voice box. The voice box allows students to share their concerns regarding

other students. Students can place a note with information of individuals who may "bother" them on campus in the voice box. The guidance counselor checks the box on a daily basis to address any issues students may be facing. Students are then provided the counseling needed to help address the issues presented.

**c. Describe the schoolwide behavioral system in place that aids in minimizing distractions to keep students engaged during instructional time. This may include, but is not limited to, established protocols for disciplinary incidents, clear behavioral expectations, and training for school personnel to ensure the system is fairly and consistently enforced.**

Wildwood Middle High School utilize a schoolwide PBIS behavior system to establish and maintain consistent behavior policies, encourage students to behave, promote positive behaviors, and enforce acceptable behaviors on campus. The PBIS site consist of administrators, instructional and non instructional staff that meets throughout the school year to review and analyze discipline data, so that the necessary changes can be made to improve discipline. Through the PBIS behavior system, students have the opportunity to earn "5 Ps"- (Prompt, Prepared, Productive, Polite, and Positive) positive behavior referrals for going above and beyond and following expectations. Students who receive "5 Ps" referrals are recognized on the morning announcements and are placed into drawings for rewards.

In addition to the schoolwide PBIS behavior system, teachers have been trained to address misbehavior in the classroom using the behavior intervention form. The Behavior Intervention Form provides teachers with steps and suggested inventions to follow before completing a long form. According to WMHS faculty handbook, teachers must complete a Behavior Intervention form and interventions before writing a Level I long form. Interventions can include but not limited to teacher held conference, isolation of student, loss of privilege, writing assignment, etc. One of the required interventions before a long form is parent contact by the teacher. If the three interventions are unsuccessful, then a long form may be written.

It is crucial that all students follow the policies of the school. Students who do not comply with school rules will participate in the discipline program. This program is not designed for students who normally complete their work and follow the school rules. It is designed to give teachers disciplinary options for students who are habitually disregarding classroom learning expectations, inclusive of not completing assignments and not following classroom and school rules. The disciplinary actions will include: in-school suspension (ISS), and out of school suspension (OSS). Students who continue to struggle with following school rules may be referred to MTSS process for behavior.

Wildwood Middle High School has a behavior support personnel and administration who ensures that students abide by the school behavior policies. Our goal is for teachers to continually motivate students, practice good classroom management skills, and use the discipline program as a last resort. This program will give teachers an important tool in maintaining control of their classrooms and maintain a safe environment where students enjoy attending school and enhance their learning.

**d. Describe how the school ensures the social-emotional needs of all students are being met, which may include providing counseling, mentoring and other pupil services.**

Wildwood Middle High School ensures the social-emotional needs of all students are met through counseling sessions by the school counselor when counseling is needed. Counselors are provided with the student information that needs to be addressed either by email, notes, and phone calls. In addition, students who may be ungovernable or truant may be referred to Youth and Family Services.

In addition, faculty and administration are advocates for the students and mentor students through the educational program. Each nine weeks, we have an advisory time called Wildcat Connection where

students meet with teachers to participate in a mentoring session to discuss behavior, attendance, and grades.

### 3. Early Warning Systems

#### a. Describe the school's early warning system and provide a list of the early warning indicators used in the system.

The early warning system data includes attendance, behavior, course failures, and achievement on statewide assessment. The early warning system is used through the PS-RTI (Problem Solving-Response to Intervention) process. There are 3 tiers in the PS-RTI process. All students are placed in Tier 1. Students who struggle academically and/or behaviorally are placed at Tier 2 or Tier 3 dependent on the severity of the issues.

#### b. Provide the following data related to the school's early warning system

##### 1. The number of students by grade level that exhibit each early warning indicator:

#### c. Describe all intervention strategies employed by the school to improve the academic performance of students identified by the early warning system.

Students who struggle academically are referred to the PS-RTI personnel. Students are provided with interventions to address their academic and/or behavior needs. Interventions for students in MTSS for behavior will include counseling services through the organization Life streams for tier 2 students and BIPS for tier 3 students. Interventions for students in MTSS for academics particularly for reading includes an intensive reading class with Learning Focused Strategies with an incorporation of Achieve 3000 reading articles and Read 180 for tier 2 students. For tier 3 students, there will be 1 on 1 instruction provided. Interventions for students in MTSS for academics particularly for math includes use of Khan Academy for tier 2 students and 1 on 1 instruction with the teacher for tier 3 students. The interventions are documented by teachers and submitted to the MTSS personnel to review for fidelity checks. Students who are successful with the PS-RTI may be referred out of the program. Students who continue to struggle even with the use of interventions may be referred to ESE.

In addition, during the school year, students receive mentoring through the Advisory period and during lunch. Teachers, administration, and counselors provide counseling services to help address the academics and behavior needs.

Student data and research based strategies are used to support and meet the diverse needs of students. In order to enhance our curriculum, make relevant learning connections and increase subject-matter comprehension, we strive to self-examine and address issues of accountability. We use Learning Focused Strategies (LFS) and Advancement Via Individual Determination (AVID) instructional strategies as a framework of effective methodologies that validate the culture of all students in the classroom and on the campus. Moreover, our school and classroom inventories includes a wide range of diverse texts that support each of the standards and meet the instructional needs of all students.

Students who struggle with a particular content is given additional instruction to provide the student multiple opportunities to master the content. Students are provided a varied amount of tasks and assignments based on their level to ultimately meet or surpass grade level expectations.

## 2. Student Transition and Readiness

### a. PreK-12 Transition

The school's response to this question may address the requirements of ESSA, P.L. No. 114-95, Â§ 1114(b)(7)(A)(iii)(V).

**1. Describe the strategies the school employs to support incoming and outgoing cohorts of students in transition from one school level to another.**

For incoming cohorts, the school coordinates a time for 5th grade teachers to met with 6th grade teachers for vertical articulation. During the vertical articulation, teachers discuss students expectations and learning goals. Curriculum information is also reviewed by counselors for incoming students to be placed in classes that will meet their academic needs. Student grades and prior curriculum history is a determining factor for students to be placed in honor courses and/or other elective courses.

For outgoing students, the current curriculum plan is sent to the other school once a release of records has been obtained. Information is shared with other schools to allow other schools to become familiar with the curriculum background data on the student(s).

Within the school, teachers collaborate and discuss with each other the strengths and struggles of students to focus on the student's needs.

### b. College and Career Readiness

**1. Describe the strategies the school uses to advance college and career awareness, which may include establishing partnerships with business, industry or community organizations.**

The strategies that Wildwood Middle High School uses to advance college and career awareness includes the use of AVID strategies, use of Cornell notes, incorporation of WICOR, and exposure to rigorous content. WMHS is an AVID school and therefore AVID is infused into 6th-12th grade and will provide further individualized instruction, and remediation to selected students. All classroom instruction must be infused with AVID strategies as part of the instruction. Students with AVID as an elective course are required to complete college applications prior to graduating.

Exposure to scholarships has also been a push for motivating students to think about their life beyond the high school time period. The counselor has been instrumental in providing FAFSA and scholarship training. Moreover, the school has a mentoring program with the New Covenant church where students are given a mentor to discuss academics and behavior. The students who complete the mentoring program throughout their high school career will earn a scholarship to a higher education institution.

Eighth grade students are given the opportunity to take the "Readi Steps" assessment that is a predictor for success on the SAT. Information from the results is forwarded to the ninth grade team where teachers can design a challenging course of study for students. Ninth through tenth grade students take advanced placement readiness courses to support the coming years with learning strategies specifically geared to the advanced course work. Furthermore, upper-level high school students are given the opportunity to enroll in advanced course study (i.e. advanced placement courses, dual enrollment). The CTE department tracks all students who enroll in a CTE course as a freshman or sophomore to ensure opportunities are presented to complete the course and gain certification prior to graduation.

***2. Identify the career and technical education programs available to students and industry certifications that may be earned through those respective programs.***

The career and technical education programs available to students at Wildwood Middle High School includes health, business, digital design, and criminal justice academies. Career teachers focus on incorporating life situations into the curriculum. Content area teachers continually incorporate current topics, trends and technology use into daily lessons. The Bio-Tech academy provides students with real-world opportunities in the field of health occupations. Agriculture and Future Farmers of America also provide students with opportunities to see the relationship between coursework and how it applies to their future. Criminal Justice academy provides hands-on investigative activities for solving crime scenes.

***3. Describe efforts the school has taken to integrate career and technical education with academic courses (e.g., industrial biotechnology) to support student achievement.***

Wildwood Middle High School's efforts of integrating career and technical education with academic courses has been to offer students choices of AP and Dual enrollment which provide rigorous and enriching content. Spring Board classes are offered to select 9th grade reading students. Spring Board classes are academically challenging and prepare students for success in college. All senior students are placed in English IV-Reading for College Success or Literature Honors. We also offer ACT and SAT testing and vouchers are available to students who qualify. Guidance periodically schedules on-campus college representative visits. WMHS is focused on preparing students to be responsible citizens when they graduate thus increasing the focus on college and career readiness.

***4. Describe strategies for improving student readiness for the public postsecondary level based on annual analysis of the [High School Feedback Report](#), as required by section 1008.37(4), Florida Statutes.***

The strategies for improving student readiness for the public postsecondary level has been usage of LFS and AVID strategies. These strategies are infused in the core courses at WMHS. "AVID's mission is to close the achievement gap by preparing all students for college readiness and success

in a global society" (<http://www.avid.org/>). WMHS's school-wide focus is to incorporate WICOR strategies in all courses on campus and increase academic vocabulary. Utilization of Cornell notes allow students to practice effective note-taking skills while critically thinking about the content at hand. The skills students learn from AVID provides the students with the tools necessary to be successful at the post secondary level.
