| SI Region | Southeast |
| Regional Executive Director | LaShawn Russ-Porterfield |
| Turnaround Option/Cycle | N/A |
| Year | |
| Support Tier | |
| ESSA Status | N/A |

* As defined under Rule 6A-1.099811, Florida Administrative Code. For more information, click here.

School Board Approval

This plan is pending approval by the Brevard County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

- 1. have a school grade of D or F
- 2. have a graduation rate of 67% or lower
- 3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at <u>www.floridacims.org.</u>

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

Our mission is to serve every student with excellence as the standard.

Six Conditions for a Glasser Model Quality School:

Quality develops with warm, caring, trusting relationships. Quality is always useful. Quality is the best everyone can do at the time. Quality always feels good. Quality is never destructive. Quality can always be improved.

Caring Habits for a Quality School:

Listening – Try to understand the perspective of others; be aware of our perceptions and the perceptions of others.

Supporting – uphold, value, validate; believe in the other person.

Encouraging – See strength in others; have confidence in others.

Respecting - Hold others in high regard; believe in the person.

Trusting – Communicating I care; I am here to help, not to hurt you.

Accepting – See value, work and capability in others.

Negotiating Disagreements – Value the relationship; agree to talk it out; win/win.

Provide the school's vision statement.

Students at Ralph Williams Elementary discover that learning adds quality to their lives.

School Leadership Team

Membership

Identify the name, email address and position title for each member of the school leadership team:

| Name | Title | Job Duties and Responsibilities |
|-------------------|------------------------|--|
| Back, Terrie | Assistant Principal | Curriculum Support, Testing Coordinator, Behavior Management, Observation and Feedback, and MTSS Facilitator. |
| Webb, Jessica | | Lesson Modeling, Curriculum Design, Collaborative Planning Facilitator, Data Analysis, and Intervention Design. |
| Herold, Wesley | Principal | Learning Cycle Facilitation, Communicating Action Plan with Stakeholders, Collaborative Planning Facilitator, Data Analysis, Observation and Feedback, and Instructional Coaching. |

Early Warning Systems

Current Year

The number of students by grade level that exhibit each early warning indicator listed:

Analysis

Data Reflection

Answer the following reflection prompts after examining any/all relevant school data sources (see guide for examples for relevant data sources).

Which data component showed the lowest performance? Explain the contributing factor(s) to last year's low performance and discuss any trends.

ELA proficiency was the lowest performing category. This is reflected in the overall proficiency as well as subgroups. Students with Disabilities, Black/African American, and English Language Learners all performed below 36% proficiency. Whole group instruction has been a main emphasis in prior years. Data driven small groups have only occurred during Rtl.

Which data component showed the greatest decline from the prior year? Explain the factor(s) that contributed to this decline.

Math learning gains reflected the largest decline from 78% to 62%. In 2017-2018 we implemented Eureka Math curriculum after having historically low performance in math in 2016-2017. Learning gains were extremely high in 2017-2018. While we had a lower percentage of learning gains, 62% is above average from prior years performance.

Which data component had the greatest gap when compared to the state average? Explain the factor(s) that contributed to this gap and any trends.

When comparing the performance of our Asian Subgroup, they were outperformed by the state in ELA (School: 75%, State 80%) and Math (School: 66%, State: 85%). English Language Learners also showed a significant gap in ELA (School: 30%, State: 39%). Our Asian Subgroup is also 50% Exceptional Education for those that were tested for FSA. Our professional development was focused

on whole group instructional delivery using learning targets. Data driven small groups based on performance on grade level standards has not been as much of a consistent practice.

Which data component showed the most improvement? What new actions did your school take in this area?

ELA Lowest 25% Learning Gains showed the most growth in our school wide data. We increased from 43% in 2017-2018, to 60% in 2018-2019. We conducted quarterly data chats with our Lowest 25% for both ELA and Math. We discussed who was growing and who was struggling and what we could try to include to support them. We also included goal setting for our students in the lowest 25%.

Reflecting on the EWS data from Part I (D), identify one or two potential areas of concern? (see Guidance tab for additional information)

Our students in the subgroup Free-Reduced Lunch were suspended at a higher rate than our other subgroups. We also have 20 students that received a Level 1 in either ELA or Math in 2018-2019. 75% of our students that were Free-Reduced Lunch and were suspended also earned a Level 1 in ELA or Math.

Rank your highest priorities (maximum of 5) for schoolwide improvement in the upcoming school year.

1. Subgroup Achievement Performance (Students with Disabilities, Black/African American, and English Language Learners).

- 2. Increase the delivery of data based small group instruction during core academic time.
- 3. Reduce the suspension rate of students in the Free-Reduced Lunch subgroup.

Part III: Planning for Improvement

Areas of Focus:

| #1 | |
|---|--|
| Title | Subgroup Performance (ESE, Black/African American, English Language Learners) |
| Rationale | Students with Disabilities continues to be our lowest performing subgroup. 24% of our SWD's are proficient in ELA and 32% are proficient in Math. |
| State the measurable outcome the school plans to achieve | Students with Disabilities will improve their proficiency level from 24% to 35% in ELA and 39% to 45% in Math. |
| Person responsible for monitoring outcome | Wesley Herold (herold.wesley@brevardschools.org) |
| Evidence- based Strategy | Data based small group instruction |
| Rationale for Evidence- based Strategy | Our focus the past few years has been centered around improving core instruction. We saw increased performance from that work, but also experienced some decreases in the past year. Our Students with Disabilities, English Language Learners, and our Black/ African American subgroups continue to perform below 40% proficiency. Students haven't responded as well to the emphasis on the core instruction. Students will benefit from using data to determine gaps and designing small group instruction to meet student needs. |
| Action Step | |
| Description | Analyze data from iReady diagnostic and benchmark data Provide Professional Development to share best practices on establishing a structure to allow for small groups and for instruction at the teacher table. Conduct learning walks with grade level teams to observe and provide feedback Administer Standards Mastery Assessments Analyze data from Standards Mastery Assessments and feedback from observations Design lessons collaboratively to address student gaps. Reflect on instruction and make adjustments as needed. |
| Person Responsible | Wesley Herold (herold.wesley@brevardschools.org) |

| #2 | |
|--|--|
| Title | Achievement Proficiency in ELA and Math |
| Rationale | Overall achievement for the school decreased by 8% in ELA and 5% in Math. |
| State the measurable outcome the school plans to achieve | Overall proficiency in ELA will increase from 62% to 72% and in Math will increase from 69% to 75%. |
| Person responsible for monitoring outcome | Wesley Herold (herold.wesley@brevardschools.org) |
| Evidence- based Strategy | Data based small group instruction |
| Rationale for Evidence- based Strategy | Our focus the past few years has been centered around improving core instruction. We saw increased performance from that work, but also experienced some decreases in the past year. Students haven't responded as well to the emphasis on the core instruction. Students will benefit from using data to determine gaps and designing small group instruction to meet student needs. |

| #3 | |
|--|--|
| #J | Learning Gains Achievement in ELA and Math |
| Inte | Learning Gains Achievement in ELA and Math |
| Rationale | Learning Gains for the school increased by 10% in ELA and decreased by 15% in Math. Our Lowest 25% ELA gains were higher than our overall learning gains in and we would like to see an increase for all students. |
| State the measurable outcome the school plans to achieve | Overall learning gains in ELA will increase from 65% to 72% and in Math will increase from 64% to 70%. |
| Person responsible for monitoring outcome | Wesley Herold (herold.wesley@brevardschools.org) |
| Evidence- based Strategy | Data based small group instruction |
| Rationale for Evidence- based Strategy | Our focus the past few years has been centered around improving core instruction. Additional Schoolwide Improvement Priorities (optional)

After choosing your Area(s) of Focus, explain how you will address the remaining schoolwide improvement priorities (see the Guidance tab for more information).

To address a reduction in our suspension rate for our Free-Reduced Lunch Subgroup, we will continue our focus of Community Circles on Friday's to reflect and discuss character. Students will set personal goals for the next week. Our guidance counselor is conducting a survey to connect with our 4th-6th grade classes to identify student social emotional needs. Our counselor is also discussing with our local high school the possibility of establishing a mentor program.
