School Board Approval

This plan is pending approval by the Orange County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

With the support of families and the community, we create enriching and diverse pathways that lead our students to success.

Provide the school's vision statement.

To ensure every student has a promising and successful future.

School Leadership Team

Membership

Identify the name, email address, position title, and job duties/responsibilities for each member of the school leadership team.:

Name	Title	Job Duties and Responsibilities
Gangwisch, Jay	Principal	<ul style="list-style-type: none"> - Oversee all higher-level operations in a school - Create a safe learning environment and set performance goals both for students and teachers, and oversee the process so that those goals are attained
Connell, Andrew	Assistant Principal	<ul style="list-style-type: none"> - Support and motivate teachers to provide students with a high standard level of education - Work with district administrators and the school principal and discuss and implement changes in policy and educational goals
Althouse, Megan	Other	Curriculum Resource Teacher (CRT) <ul style="list-style-type: none"> - Share instructional resources, implement effective teaching strategies and oversee school-wide testing
Reyes, Mabel	Other	ESOL Compliance Specialist. Ms. Reyes ensures the compliance and staffing for the needs of our ELL students.
Turner, Debra	Instructional Coach	- Share instructional resources, implement effective teaching strategies, and guide teachers on instructional best practices supporting the staff
Keysor, Aundrea	Other	Staffing Specialist overseeing the special needs units

Demographic Information

Principal start date

Thursday 6/18/2020, Stacey Price

Number of teachers with a 2019 3-year aggregate or a 1-year Algebra state VAM rating of Highly Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

Analysis

Data Reflection

Answer the following reflection prompts after examining any/all relevant school data sources (see guide for examples for relevant data sources).

Which data component showed the lowest performance? Explain the contributing factor(s) to last year's low performance and discuss any trends.

On the surface, the component that showed the lowest decline was a drop in proficiency of 8% in Grade 5 Mathematics, however it is also important to consider these student's level of proficiency from the year prior when they were in Grade 4. When utilizing prior data that is specific to these students from their previous grade, we can see that the decline in proficiency is actually a much more alarming 12%. What this means is that out of the total number of students who came to Grade 5 demonstrating a level of proficiency, 18.56% of those students did not retain their level of proficiency. Grade 5 was departmentalized last year, and an interesting counterpoint to the dramatic decline of proficiency in math is an incremental improvement in ELA. Once again, on the surface when only evaluating proficiency level of the previous year's Grade 5 students, it appears that the proficiency level remained stagnant at 65%. It is important, however to consider the picture as you loop the data from Grade 4 in the previous year with the students. When viewing the data from this standpoint, the proficiency level did not remain stagnant, rather it improved by 2%. While this is a small improvement, it is demonstrative of the student capability and draws even more attention to the significant losses in Mathematics. What this now indicates was a weakness in instruction in Mathematics classrooms and a strength in instructional practices in ELA classrooms.

Which data component showed the greatest decline from the prior year? Explain the factor(s) that contributed to this decline.

Once again, Grade 5 Mathematics showed a decline of 8% from the previous year's Grade 5 data. It is also important to draw attention to one other area that experienced decline. Grade 4 ELA shows improvement from the previous Grade 4 ELA proficiency percentage, however if you loop the data up with the students then you can see a decline in Grade 4 proficiency of 4%.

Which data component had the greatest gap when compared to the state average? Explain the factor(s) that contributed to this gap and any trends.

The greatest gap compared to state average is Grade 3 ELA which trends 15% above the state average. More concerning, however, is the smallest gap when compared to the state average. All gaps when compared to state average indicate above average performances, with the exception of Grade 5 Mathematics which highlights a gap of 7% below the state average.

Which data component showed the most improvement? What new actions did your school take in this area?

The data components that showed the most improvement were Grade 3 ELA and Grade 4 Mathematics both with an increase in proficiency of 4%. When considering Grade Level Performance, however, it is also important to consider the Grade 4 ELA decline and also the Grade 3 Mathematics increase. This suggests a stronger instructional performance from the Grade 3 team as opposed to the Grade 4 team.

Reflecting on the EWS data from Part I (D), identify one or two potential areas of concern?

The main area of concern is Grade 5 Mathematics, followed by Grade 4 ELA and writing in both 4th and 5th Grade.

Rank your highest priorities (maximum of 5) for schoolwide improvement in the upcoming school year.

- 1.Emphasis on SEL within our school culture and curriculum.
- 2.Emphasis on data analysis and implementing data-driven instruction and interventions
- 3.Writing school wide is not a priority
4. Effective PLC Collaboration
5. Standards focused instruction and grading practices
6. Vetted and valid common assessments

Part III: Planning for Improvement

Areas of Focus:

#1. Instructional Practice specifically relating to Standards-aligned Instruction

Area of Focus Description and Rationale: SPES staff will use standards-based instruction from the Florida Standards focusing on rigor, depth of complexity/ text complexity, effective implementation of standards-based instruction, and using the collaborative planning process. Use of these standards, as well as the backwards design model, will ensure that teachers are planning for high quality instruction that focuses on a defined Depth of Knowledge (DOK) level and outcome for learning. Collaborative planning and social emotional learning, as highlighted through the District Professional Learning (DPLC) process, is designed to ensure that all scholars in OCPS are engaged in rigorous learning activities that engage scholars in complex texts and critical thinking across all content areas and support their social emotional needs. Current Sunset Park data demonstrates that there continues to be a need for ensuring the alignment and monitoring for both mastery of standards (proficiency levels) and continued growth (learning gains) in all content areas.

Measurable Outcome: Through the use of our school-based Professional Learning Community (PLC) process along with monitoring and support, individual teams will meet weekly with administration and instructional coaches to develop and plan for instruction using and analyzing data from both i-Ready and common unit assessments. Through this planning process, teams will work to target skills and strategies that will support the mastery of standards (proficiency), as well as close the achievement gaps (learning gains) as identified by the formative and summative assessments. This will be accompanied by the point system included in the Ron Clark House system for supporting the student’s social emotional needs.

Person responsible for monitoring outcome: Jay Gangwisch (jay.gangwisch@ocps.net)

Evidence-based Strategy: The administrative team will monitor the standards-based grading, iReady data, and formative and summative assessments.

Rationale for Evidence-based Strategy: Using four data points to monitor for alignment will offer validity to our data and enable us to correctly set up intervention groups targeting specific student needs.

Action Steps to Implement

1. Monitoring of points for House System
2. Introduce Standards based grading
3. iReady data analysis training
4. Introduce common assessment collaborative planning and vetting process for the year
5. Monitor testing results and intervention planning
6. Correlate data points for validity of assessments and grading

Person Responsible Jay Gangwisch (jay.gangwisch@ocps.net)

#2. Culture & Environment specifically relating to Social Emotional Learning

Area of Focus Description and Rationale: Healthy schools are characterized by positive school climates that support student learning, development, and well-being by providing safety, support and connectedness, academic challenge and engagement, and cultural responsiveness. Through our previous year's Advanced Ed data, a focus on our culture and climate was an area of need.

Measurable Outcome: We will analyze our Advanced Ed data as well as climate surveys and family, student, and staff participation.

Person responsible for monitoring outcome: Jay Gangwisch (jay.gangwisch@ocps.net)

Evidence-based Strategy: With a strong focus on Social Emotional Learning, our students and staff will continue to develop our Ron Clark House System. This system builds community and ensures our students are equipped with the tools they need to succeed. Students will work towards common goals through character building and relationship skills. Academic and social challenges will help our students to develop grit and doing so in their house groups will allow for collaboration and self discipline. We will have at least one house rally per semester and one house lunch per quarter to give students time to socialize and grow within their house groups. 100% of our students and staff will be assigned to a house ensuring we have full participation at Sunset Park Elementary.

Rationale for Evidence-based Strategy: SEL refers to the process of learning, practicing, and building competencies such as self-awareness, self-management, social awareness, relationship skills, and responsible decision making. SEL interventions in schools have been shown to both improve school climate and student's behavioral and academic functioning.

Action Steps to Implement

- 1.) Implementation of Sanford Harmony SEL Program
- 2.) Continued Implementation of the House System.
- 3.) Increased communication with stakeholders for increased participation in school related functions.
- 4.) Implementation on reward system for character.

Person Responsible: Andrew Connell (andrew.connell@ocps.net)

Additional Schoolwide Improvement Priorities

After choosing your Area(s) of Focus, explain how you will address the remaining schoolwide improvement priorities.

The two other areas of focus will be on upper grades math and writing schoolwide. For math instruction we have hired a math instructional coach who has re-designed the math block with a 15 minute whole group followed by three rotation blocks of Standards: Focuses on a trailing standard (either the previous day's material, material that was recently retaught, etc.) that students should be able to complete independently, or at least productively struggle through. Computer: iReady. Teacher Led: A continuation of instruction from the Whole Group with either the addition of manipulatives or differentiation of instruction in some capacity. The end will consist of an exit ticket. Exit slips should be a formative assessment on the standard that was newly introduced this day to assess whether students have grasped the new content. This can simply be a problem that meets the full rigor of the standard.

Data that Coaches will track:

iReady: Diagnostics will be used as data points and administered 3 times a year (BOY-beginning of year, MOY-middle of year, EOY-end of year).

Unify: All summative assessments will be administered through Unify. CRM summative assessments are already created in Unify and only need to be released to students. Unify will automatically grade summative assessments by standard and disaggregate data accordingly by both class and student.

Data that Teachers will track:

iReady: Each student is responsible for 45 minutes of Instructional Usage time in iReady each week. More or less time than 45 minutes is not shown to be effective. Teachers should keep track of their student minutes and hold students accountable using a system of their choice. See example below:

Standard Mastery: This can be tracked through any means that the teacher chooses, however Achievement Task Cards will be provided for the first unit and PLCs will be provided with time to develop Achievement Task Cards for each unit moving forward. They provide an easy and concise way to track standard mastery as well as provide remediation and enrichment.

Writing will be implemented daily schoolwide. Our new reading specialist has redesigned the ELA block. The block will be 30-40 minutes: Whole Group •Teacher delivers explicit instruction and students follow along with activity while teacher circulates the room. •All mini assessments and unit assessments should be debriefed within a few days of students completing the test. This should be the teacher modeling how to find the answer, finding the evidence and discussing the text with students.

50-60 minutes small groups focusing on-

Standards: Students will continue to work on the standard that was being taught during whole group—activity can be different but should focus on same standard(s).

Writing: Students will respond to reading, practice RACE writing, peer review, revise writing, etc.

Computers: -AR (should be for just a few minutes)-i-Ready (students should do 45 minutes per week-no more than that)-Canvas activities like discussion posts.

Teacher table: -Students will work with the teacher.-Ex.Standards practice, reading comprehension, fluency, enrichment, vocabulary, phonics, etc.

5 minutes: Exit Ticket•Students should be completing a formative assessment/exit ticket to check for understanding.

Tests•Mini/formative assessments should be given before the unit assessment. •Grades 3-5 should use CommonLit.org to administer these assessments. It is free, grades for you and allows you to compile some great data. •Unit tests will be from the CRM.

All grades will be standards based. They will write the standard that matches each assignment they grade in the assignment title (ex. RL.1.2 –Theme -Monkey passage). Also, summative assessment grades will be per standard, meaning if the summative assessment includes questions based on 3 standards, each standard and the questions that match it will be their own grade so the summative assessment will show up as three different grades. There will be no retesting opportunities for summative assessments in reading.

Part IV: Positive Culture & Environment

A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning, and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups to employ school improvement strategies that impact the positive school culture and environment are critical. Stakeholder groups more proximal to the school include teachers, students, and families of students, volunteers, and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services, and business partners.

Stakeholders play a key role in school performance and addressing equity. Consulting various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies.

Describe how the school addresses building a positive school culture and environment ensuring all stakeholders are involved.

With a strong focus on Social Emotional Learning, our students and staff will continue to develop our Ron Clark House System. This system builds community and ensures our students are equipped with the tools to they need to succeed. Students will work towards common goals through character building and relationship skills. Academic and social challenges will help our students to develop grit and doing so in their house groups will allow for collaboration and self discipline. We will have at least one house rally per semester and one house lunch per quarter to give students time to socialize and grow within their house group. 100% of our students and staff will be assigned to a house ensuring we have full participation at Sunset Park Elementary. This is supported by staff, students and families as well as our PTO and other supportive organizations and clubs.

Parent Family and Engagement Plan (PFEP) Link

The school completes a Parental Involvement Plan (PFEP), which is available at the school site.

Part V: Budget

The approved budget does not reflect any amendments submitted for this project.

1	III.A.	Areas of Focus: Instructional Practice: Standards-aligned Instruction	\$0.00
2	III.A.	Areas of Focus: Culture & Environment: Social Emotional Learning	\$0.00
Total:			\$0.00
