School Board Approval

This plan is pending approval by the Manatee County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

The mission of Palm View K-8 is to provide an educational environment that enables students to develop to their fullest potential through the cooperative effort of the total school community.

Provide the school's vision statement.

Palm View School's faculty and staff are committed to providing students exemplary instruction that nurtures intellectual curiosity, critical thinking, and a passion for learning. We will work collaboratively to prepare our students for success to graduate from high school on schedule, with the skills and knowledge required for success in higher education and/or the work place.

Our vision is that every child will reach grade-level proficiency in reading, writing, mathematics and science. We will work to insure that everyone in our school rallies around this vision; that everyone in the school can share how we are working on our goals together; and that all of us are focused on mutual growth and improvement.

School Leadership Team

Membership

Identify the name, email address, position title, and job duties/responsibilities for each member of the school leadership team.:

Name	Title	Job Duties and Responsibilities
Johnson, Kaththea	Principal	
Dougherty, James	Assistant Principal	
Clark, Michelle	Assistant Principal	
Burton, Jennifer	Other	Coordinator
Arreaga, Monica	Attendance/Social Work	Grad Enhancement Tech

Demographic Information

Principal start date

Wednesday 7/11/2018, Kaththea Johnson

Number of teachers with a 2019 3-year aggregate or a 1-year Algebra state VAM rating of Highly Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

Number of teachers with a 2019 3-year aggregate or a 1-year Algebra state VAM rating of Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

Total number of teacher positions allocated to the school

Analysis

Data Reflection

Answer the following reflection prompts after examining any/all relevant school data sources (see guide for examples for relevant data sources).

Which data component showed the lowest performance? Explain the contributing factor(s) to last year's low performance and discuss any trends.

*Due to not having State Assessment data for the 2019-2020 school year, we are choosing to continue our same focus/goals set forth using the 2018-2019 school grade data along with our quarterly benchmark data from the 2019-2020 school year (3rd - 6th). This school year, we are adding 7th and 8th grade which means in addition to our ELA and Math goals, we will be adding 8th gr Science, 7th/8th Social Studies Achievement, and MS Acceleration. All of the responses for this Needs Assessment/Analysis are from the 2018-2019 school year data with added notes using our 2019-2020 quarterly benchmarks and knowing we have added 7th and 8th grade this school year.

2018-2019: 5th Grade Science at 37% Proficiency. While we did not achieve our goal for overall proficiency in the 5th grade Science assessment (50%), we did increase our percentage from 25% to 37%. We are choosing to maintain our initial goal for at least 50% proficiency. In addition to

maintaining what was implemented last year, we plan to incorporate a deeper understanding and application of rigorous assignments/assessments through the Learning Focused Framework. We also plan to continue to support a K-8 level of understanding of the Science standards and progression. We will support this through collaborative planning.

2020-2021: We have 61 current 8th grade students who will factor into our Science bucket. Knowing this area correlates with ELA proficiency along with prior Science data that shows as our lowest area, this is an area of focus.

Which data component showed the greatest decline from the prior year? Explain the factor(s) that contributed to this decline.

2018-2019: No areas declined. However, our 2019-2020 quarterly benchmarks predicted us with the largest possible decline in the following areas: ELA-Proficiency (-3), LG (-12), and L25 (-29). Possible factors include the addition of 6th grade (125 students), an increase in ELL/ESE students, teachers new to Palm View, 6th grade teachers not a part of the initial building year with Learning Focused.

2020-2021: Adding 7th and 8th grade along with increasing our ELL and ESE population overall, an area of concern is ELA since the proficiency numbers are currently on a decline from 6th grade up to 8th.

6th: 34%, 7th: 22%, 8th: 16%

Which data component had the greatest gap when compared to the state average? Explain the factor(s) that contributed to this gap and any trends.

2018-2019: There are only two areas where we have a negative gap from the state: ELA Proficiency and Science Proficiency. ELA proficiency is 41% which is a 16 point gap from the State and Science proficiency is 37% which is a 16 point gap from the State. While both areas increased significantly from the prior year (ELA +14; Science +12), we are still not even or above the state level of performance. Being a Title I school and having a large number of students with significant Literacy gaps, this poses an area to continue to target and seek learning gains. We will continue to focus on increasing learning gains to ultimately close the proficiency gap with our students which will ultimately close the gap between how our students perform as compared to their peers across the State. We will do this through small group instruction, analysis of data and use to drive instruction, along with a continued emphasis on standards-based planning and instruction. In addition to maintaining what was implemented last year, we plan to incorporate a deeper understanding and application of rigorous assignments/assessments through the Learning Focused Framework. We will support this through collaborative planning.

2020-2021: Expanding to a full K-8, our ESE and ELL population has significantly increased. Since this is already an identified area of focus, we will continue.

Which data component showed the most improvement? What new actions did your school take in this area?

2018-2019: Our largest improvement was in the area of Bottom Quartile Learning Gains for ELA (92%; +54 points). New actions taken are reflected as strategies in our 19-20 SIP: Standards based collaborative planning and instruction; fidelity to the district's instructional programs through the use of the master schedule, professional development, and feedback; data driven planning and instruction through the use of TLCs and collaborative planning; and targeted, standards-based, differentiated, grade level small group instruction with additional support pushed into ELA blocks from January to May. The use of other content areas to include Science, Social Studies, and Writing were integrated into the ELA block along with best practices and strategies from the Learning Focused model.

2020-2021: Plan is to carry the above actions forward as we add 2 additional grade levels.

Reflecting on the EWS data from Part I (D), identify one or two potential areas of concern?

2019-2020: A potential area of concern are our 6th grade students who are level 1 on the 18-19 statewide assessments (FSA ELA and FSA Math). 61 out of our 124 total 6th graders scored a level 1 on either the FSA ELA and/or the FSA Math. This is an area of focus as we review our current programs/instructional groupings offered to ensure we make adequate learning gains in addition to closing the gap on student proficiency.

2020-2021: A potential area of concern is the change in School Grade with Learning Gains, since our current 3rd and 4th grade students do not have an FSA score. Another area of concern is our middle school expansion along with the large number of non-proficient students in ELA and Math. Our current proficiency numbers are as follows:

ELA:

4th: 0; 5th: 33; 6th: 34; 7th: 22; 8th: 16

Math:

4th: 0; 5th: 52; 6th: 56; 7th: 49; 8th: 30

Rank your highest priorities (maximum of 5) for schoolwide improvement in the upcoming school year.

1. Science Proficiency; Vocabulary
2. Standards-based planning in ELA, Math, and Science; integration of Writing in all content areas
3. Small Group Instruction – targeted, differentiated, grade level
4. Data Response: Learning gains: Overall and L25 in 3rd-8th
- 5.

Part III: Planning for Improvement

Areas of Focus:

#1. Instructional Practice specifically relating to ELA

Area of Focus	We will improve student achievement by continuing to focus and support standards-based planning, highly effective instructional delivery, and fidelity to District instructional programs, required curriculum documents and data-driven decision making.
Description and Rationale:	
Measurable Outcome:	<p>(1) Grades 3-8 overall learning gains in ELA and Math will increase to at least 75%.</p> <p>(2) Grades 3-8 overall bottom quartile learning gains in ELA and Math will increase to at least 80%.</p> <p>(3) Grades 3-8 Student proficiency in ELA will increase to at least 50%.</p> <p>(4) Grades 3-8 Student proficiency in Math will increase to at least 60%</p> <p>(5) Grades 3-8 Student proficiency in 5th & 8th grade Science will increase to at least 50%.</p> <p>...as measured by the 2020-2021 Florida Standards Assessments in grades 3-8.</p>
Person responsible for monitoring outcome:	Kaththea Johnson (johnsonk@manateeschools.net)
Evidence-based Strategy:	<p>Standards Based Planning focused on both ELA and Math accomplished through weekly collaborative planning sessions with grade level teams and a member of the Leadership Team.</p> <p>Data Driven Decision making accomplished through grade level TLCs with a focus on the PV K-8 Gap Eliminator process and formative data supported by members of the Leadership Team.</p>
Rationale for Evidence-based Strategy:	In a standards-based learning classroom student are expected to meet a defined measure of proficiency that is equivalent to the rigor of that grade level standard. Students must demonstrate evidence of this learning and how it reflects the grade level standard. It is up to the classroom teacher to scaffold student learning to help students achieve the highest levels of cognitive complexity. Research for standards-based learning comes from Marzano and his Essentials for Achieving Rigor Model (Moore, Toth & Marzano, 2017). This model is often described in the research as a road map for rigor. The philosophy behind is that, "if we have expectations in the real world for student learning that is rigorous, independent and applicable in the real world, teachers need to be able to plan instruction that will help students meet those goals" (Moore, Toth & Marzano, 2017).

Action Steps to Implement

Standards Based Planning and Rigorous Instruction:

1. Assign Leadership Team Members to grade levels and specific weekly meeting times.
2. Using the "Palm View Planning Process" begin by following required district pacing guide and curriculum maps.
3. Unpack priority standards and determine LEQ's.
4. Plan formative assessments.
5. Plan lessons and activities.
6. Review data from formative and plan next steps.

Person Responsible Kaththea Johnson (johnsonk@manateeschools.net)

Data Driven Decision Making:

1. Assign Leadership Team Members to grade levels and specific TLC scheduled sessions to support the use of Data to make instructional decisions.
2. Use of Palm View Gap Eliminator action plan process quarterly, following Benchmark assessments

pattern scored by the district.

3. Use of Palm View formative common assessments, entered into School City; utilized with lesson planning and small group instruction.

Person Responsible Kaththea Johnson (johnsonk@manateeschools.net)

#2. Instructional Practice specifically relating to Science

Area of

Focus

Description and

Rationale:

We will improve Science achievement by implementing a K-8 Science plan to include an emphasis on integration during the ELA block as well as robust vocabulary instruction.

Measurable Outcome: Proficiency on the 2020-2021 Next Generation Sunshine State Standards Assessment for 5th & 8th grade Science will increase from 37% to at least 50%.

Person responsible for monitoring outcome:

Kaththea Johnson (johnsonk@manateeschools.net)

Evidence-based Strategy:

Robust Vocabulary Instruction in Science where teachers will teach a set of academic vocabulary words intensively across several days using a variety of instructional activities.

Rationale for Evidence-based Strategy:

This strategy was selected based on student data indicating that students at Palm View consistently struggle with vocabulary. Data from 5th grade on the 2018-2019 revealed 61% proficiency in vocabulary at Palm View as opposed to the district average of 66%. There is a direct link between vocabulary and reading comprehension (Marzano & Tickering, 2005). Further information from Marzano and Tickering (2005) purports, "One of the key indicators of students' success in school, on standardized tests, and indeed, in life, is their vocabulary. The reason for this is simply that the knowledge anyone has about a topic is based on the vocabulary of that information (p.5). This lack of vocabulary knowledge could be contributing to Palm View students struggling in Science.

Action Steps to Implement

1. Teachers in grades 3-8 will receive Professional Development on Vocabulary strategies to support Science Content from members of the Leadership Team along with support from our ELL Specialist Susan Maxwell and district Curriculum Science Specialist. This instruction will consist of teaching classroom teachers how to incorporate robust vocabulary instruction of science content words into the ELA block when teaching Information Reading Units.
2. Ongoing support for instruction will be conducted during collaborative planning sessions with teachers throughout the year utilizing district Science ELA and Science Fusion Lessons in planning.
4. Utilize vocabulary cards provided by district and have teachers create Frayer Models on focused words (use of additional Learning Focused strategies).
5. Formative assessments will be implemented and utilized to make instructional decisions and to monitor the progress of student mastery of Science standards.

Person Responsible Kaththea Johnson (johnsonk@manateeschools.net)

Additional Schoolwide Improvement Priorities

After choosing your Area(s) of Focus, explain how you will address the remaining schoolwide improvement priorities.

As stated earlier in 2.E. of the Needs Assessment/Analysis, there were no areas of decline in our data for the 2018-2019 school year. However, our 2019-2020 quarterly benchmarks predicted us with the largest possible decline in the following areas: ELA-Proficiency (-3), LG (-12), and L25 (-29). Possible factors include the addition of 6th grade (125 students), an increase in ELL/ESE students, teachers new to Palm View, 6th grade teachers not a part of the initial building year with Learning Focused. Adding 7th and 8th grade along with increasing our ELL and ESE population overall, an area of concern is ELA since the proficiency numbers are currently on a decline from 6th grade up to 8th. -> 6th: 34%, 7th: 22%, 8th: 16%.

As a result, the Leadership Team will continue to support Standards Based Collaborative Planning, rigorous instruction, and the use of formative data to continuously drive instruction, as stated in the first area of focus above.

Part IV: Positive Culture & Environment

A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning, and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups to employ school improvement strategies that impact the positive school culture and environment are critical. Stakeholder groups more proximal to the school include teachers, students, and families of students, volunteers, and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services, and business partners.

Stakeholders play a key role in school performance and addressing equity. Consulting various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies.

Describe how the school addresses building a positive school culture and environment ensuring all stakeholders are involved.

The PFEP attached addresses how Palm View will build positive relationships with all stakeholders.

We plan to build positive relationships with parents, families, and other community stakeholders by holding monthly Student Advisory Council (SAC) Meetings, distributing monthly calendars with school events, providing Parent University Workshops, weekly Principal communication via ConnectED, and teacher communication. In addition, we hold various evening events to foster a foundation for family and communal engagement. **Due to the current pandemic and required social distancing and safety guidelines, currently, all meetings and events to include all stakeholders are being held virtually.

Parent Family and Engagement Plan (PFEP) Link

The school completes a Parental Involvement Plan (PFEP), which is available at the school site.

Part V: Budget

The approved budget does not reflect any amendments submitted for this project.

1	III.A.	Areas of Focus: Instructional Practice: ELA	\$0.00
2	III.A.	Areas of Focus: Instructional Practice: Science	\$0.00

Total:	\$0.00
