School Board Approval

This plan is pending approval by the Hillsborough County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

School Board Approval

This plan is pending approval by the Hillsborough County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a school improvement plan (SIP) for each school in the district that has a school grade of D or F.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F (see page 4). For schools receiving a grade of A, B, or C, the district may opt to require a SIP using a template of its choosing. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at <https://www.floridaCIMS.org>.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

Lithia Springs will transform teaching and learning for our students by creating a student-centered ecosystem that empowers students to excel as 21st Century scholars and caring, active and positive members of our community.

Provide the school's vision statement.

Leading
Successful
Empowered
Students

School Leadership Team

Membership

Identify the name, email address, position title, and job duties/responsibilities for each member of the school leadership team.:

| Name | Title | Job Duties and Responsibilities |
|------------------------|------------------------|--|
| Martin, Kevin | Principal | The Principal directs and coordinates educational, administrative, and counseling activities of an elementary, adult, ESE or other specialized public school sites. The Principal demonstrates the Florida Principal Standards, serves as the instructional leader, and develops and evaluates educational programs to ensure conformance to state, national, and school board standards. |
| Gattullo, Kristen | Assistant Principal | The Assistant Principal, Elementary, will assist with the instructional, administrative, and operational leadership of an elementary school. |
| Ackermann, Danielle | School Counselor | The Counselor, Elementary School, is responsible for coordinating and implementing the school’s counseling services program to include academic advisement and counseling, developmental guidance, career development, and parent/community involvement. |
| Echols, Laurie | Instructional Coach | The Reading Coach will maintain and monitor the implementation of the reading program, including professional development of school personnel. The Reading Coach is responsible for ensuring the comprehensive instruction of reading within the school, as well as compliance with FullTime Equivalency (FTE) rules and guidelines from the Florida Department of Education and the United States Department of Education.. |

Demographic Information

Principal start date

Sunday 1/3/2016, Amber Cronin

Number of teachers with a 2019 3-year aggregate or a 1-year Algebra state VAM rating of Highly Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

3

Number of teachers with a 2019 3-year aggregate or a 1-year Algebra state VAM rating of Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

11

Analysis

Data Reflection

Answer the following reflection prompts after examining any/all relevant school data sources (see guide for examples for relevant data sources).

Which data component showed the lowest performance? Explain the contributing factor(s) to last year's low performance and discuss any trends.

Math bottom quartile gains was our lowest category at 41% compared to the district's 46% and the state's 51%. Subgroups within the bottom quartile include SWD 44%, Hispanic 31%, White 38% and Free and reduced lunch 24%. More current data from the iReady winter diagnostic shows that 32% of our school is at Tier 2 and 3% is at Tier 3 in math. The majority of these students are 3rd, 4th and 5th grade. In 2018 for the same diagnostic 26% of the students were at tier 2 and 3% at tier 3. We feel that there is not enough differentiation in our math classes included guided math groups and teaching to the core. Teachers report the greatest challenge is lack of number sense.

Which data component showed the greatest decline from the prior year? Explain the factor(s) that contributed to this decline.

Math learning gains declined by 7 points from the previous year and math learning gains for the lowest 25th percentile dropped by 14 points from the previous year. We feel that there is not enough differentiation in our math classes included guided math groups and teaching to the core. Teachers report the greatest challenge is lack of number sense.

Which data component had the greatest gap when compared to the state average? Explain the factor(s) that contributed to this gap and any trends.

The math learning gains for the lowest 25th percentile trails the state average by 6 points. The school is above the state average in all other categories. We feel that there is not enough differentiation in our math classes included guided math groups and teaching to the core. Teachers report the greatest challenge is lack of number sense.

Which data component showed the most improvement? What new actions did your school take in this area?

ELA Learning gains for the lowest 25th percentile increased by 14 points from the previous year. Our reading coach did grade level book studies for defined areas of need. K,1,2 worked through "The Next Steps Forward in Guided Reading" by Jan Richardson and 3,4,5 worked through "Reading Strategies" by Jennifer Serravallo. As a school, we became an AVID Elementary which allowed our teachers to take part in various training. Note taking and increasing rigor through WICOR was found in most grade levels.

Reflecting on the EWS data from Part I (D), identify one or two potential areas of concern?

One area of concern is the number of students with an attendance rate less than 90% and the number of retentions.

Rank your highest priorities (maximum of 5) for schoolwide improvement in the upcoming school year.

1. Increase math learning gains for the lowest 25th percentile
2. Increase math learning gains overall
3. Increase ELA learning gains for the lowest 25th percentile
4. Increase overall math achievement
5. Increase overall science achievement

Part III: Planning for Improvement

Areas of Focus:

#1. Leadership specifically relating to Managing Accountability Systems

Area of Focus Description and Rationale: Efficient progress monitoring is an area of focus we will work on as a school. As our math learning gains are not what we expect, it is critical that we identify and address areas of opportunity as lead data points are identified rather than waiting to see what the lag data points tell us.

Measurable Outcome: The specific objective is to create high level progress monitoring so that all students make at least a one year gain in math. This will be measured through iReady diagnostic data.

Person responsible for monitoring outcome: Kevin Martin (kevin.martin@hcps.net)

Evidence-based Strategy: Grade levels will use the 4 Disciplines of Execution to help drive the work. This will allow them to progress monitor on a weekly basis and adjust as they see the effectiveness of instruction.

Rationale for Evidence-based Strategy: The strategy behind 4DX is to empower all on the team to take personal responsibility for the learning - they will be accountable to their team mates directly and administration indirectly. The grade levels will define the lag data points they want to address that will push the overall school lag data points. Once identified, they will define and measure lead data points on a weekly basis that will get them to their lag measure.

Action Steps to Implement

Initial 4 Disciplines of Execution training - introduction during pre-planning.

Person Responsible Kevin Martin (kevin.martin@hcps.net)

In depth 4DX training for grade level teams. The training will allow teams to start to differentiate between lead and lag data and what that looks like with the students and resources they have.

Person Responsible Kevin Martin (kevin.martin@hcps.net)

Grade level specific WIG (wildly important goal) session where the teams will define their first lag measures and go through the process of setting commitments for the coming week. They will begin the design of their scoreboards that will be posted in the office area.

Person Responsible Kevin Martin (kevin.martin@hcps.net)

Weekly grade level WIG / PLC Meetings - ILT members will be charged with following the agenda for the WIG session. Teachers will each talk about the status of the commitment they made for the previous week, the group will discuss how their commitments are moving the lead measures and what barriers they can remove for each other and then they will commit to an activity for the coming week. Through their discussion, T3 and T2 students will be discussed and forwarded to PSLT as needed.

Person Responsible Kevin Martin (kevin.martin@hcps.net)

Additional Schoolwide Improvement Priorities

After choosing your Area(s) of Focus, explain how you will address the remaining schoolwide improvement priorities.

Learning gains in math and reading will continue to be an area of focus. By emphasizing collaboration and planning through the 4DX process, grade level teams will be enabled to adjust instruction in the short term to ensure long term gains.

Part IV: Positive Culture & Environment

A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning, and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups to employ school improvement strategies that impact the positive school culture and environment are critical. Stakeholder groups more proximal to the school include teachers, students, and families of students, volunteers, and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services, and business partners.

Stakeholders play a key role in school performance and addressing equity. Consulting various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies.

Describe how the school addresses building a positive school culture and environment ensuring all stakeholders are involved.

Lithia Springs relies on our community being a part of our school. For parents this means volunteering through PTA for events, classroom projects and weekend events such as Beautification Day. Our PTA maintains strong relationships with community businesses who support the school in terms on monetary donations as well as collateral materials and support. Students know our Vision "Leading Successful Empowered Students" and are able to tell visitors what it means to be a Lithia Lynx.

Input from the community is gathered through PTA General Meetings as well as our School Advisory Committee.

Parent Family and Engagement Plan (PFEP) Link

The school completes a Parental Involvement Plan (PFEP), which is available at the school site.

Part V: Budget

The approved budget does not reflect any amendments submitted for this project.
