Demographics

Principal: Terri Christian

Start Date for this Principal: 7/23/2015

2019-20 Status (per MSID File)	Active
School Type and Grades Served (per MSID File)	Middle School 6-8
Primary Service Type (per MSID File)	K-12 General Education
2020-21 Title I School	Yes
2020-21 Economically Disadvantaged (FRL) Rate (as reported on Survey 3)	100%
2020-21 ESSA Subgroups Represented (subgroups with 10 or more students) (subgroups below the federal threshold are identified with an asterisk)	Students With Disabilities* English Language Learners* Black/African American Students* Hispanic Students* Multiracial Students* White Students Economically Disadvantaged Students*
School Grades History	2018-19: D (40%) 2017-18: C (45%) 2016-17: C (42%)
2019-20 School Improvement (SI) Information*	
SI Region	Southwest
Regional Executive Director	
Turnaround Option/Cycle	N/A
Year	
Support Tier	
ESSA Status	

* As defined under Rule 6A-1.099811, Florida Administrative Code. For more information, [click here](#).

School Board Approval

This plan is pending approval by the Polk County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

Denison Middle School will provide a diverse 21st century learning experience.

Provide the school's vision statement.

At Denison Middle School we will:

- Provide a challenging, standards based educational program, preparing students for success in high school and beyond
- Create an environment of educational excellence by using a variety of instructional strategies and activities to address the varied learning strengths of our students
- Provide a caring, nurturing environment in which all students can feel supported and safe emotionally, intellectually, and physically
- Build positive personal characteristics such as tolerance, integrity, cooperation and honesty, and encourage respect for the individual differences that make each of us unique
- Prepare our students for college and/or careers

School Leadership Team

Membership

Identify the name, email address, position title, and job duties/responsibilities for each member of the school leadership team.:

Name	Position Title	Job Duties and Responsibilities

Analysis

Data Analysis

Answer the following analysis questions using the progress monitoring data and state assessment data, if applicable.

What trends emerge across grade levels, subgroups and core content areas?

Performance trends observed include a need to focus on all subgroups. Science continues to be an area where school performance trails the performance of our district as well as the state. All grades showed inconsistent gains throughout the school year. Mathematics had the greatest gains across all grade levels for the Fall and Winter progress monitoring assessments but showed a decrease in gains during the Winter and Spring assessments. Economically disadvantaged scholars' performance is in line with the performance of all scholars. Students with disabilities showed the greatest gains between the Fall and Winter assessments for all grade levels in Mathematics. As quarantines increased, a drop in performance was observed in all content areas for the scholars and staff that were quarantined.

What data components, based off progress monitoring and 2019 state assessments, demonstrate the greatest need for improvement?

Science and Civics data demonstrate the greatest need for improvement. 2019 state assessment data show Science and Civics proficiency trailed district and state rates. There was a 16% difference in Science data compared to the district. Civics data showed a 27% difference when compared to the district. District progress monitoring quarterly assessments show a decline in gains between the Fall, Winter and Spring assessments for both assessments. English Language Arts and Mathematics data also show a need for a consistent increase in gains across all assessment windows. Both areas show a continued need to focus on subgroups. 6th grade English Language Arts and Mathematics performance gains were minimal.

What were the contributing factors to this need for improvement? What new actions would need to be taken to address this need for improvement?

Staff and scholar attendance were contributing factors to this need for improvement. A considerable number of staff and scholars were quarantined over 3 times during the year. Each quarantine ranged from 10 – 14 days each. This was more than 40 days for some scholars and staff. This loss of instructional time has a negative effect on learning. Substitute teachers were difficult to obtain which resulted in support staff and para educators abandoning their support positions to continue learning in uncovered classrooms.

There is limited time for collaborative planning. One day a week is required with administration and on short weeks, on collaborative planning is required. More directed planning is needed to support teachers especially those new to education. Additionally, planning was conducted virtually which removed the personal effect and made reviewing scholar work samples difficult.

Teachers and scholars were introduced to a new learning management system with little training and

time to learn it. This new integration of technology resulted in a steep learning curve at the start of the school year.

There was decreased participation in tutoring as compared to prior years. Tutoring was offered in person and virtually.

What data components, based off progress monitoring and 2019 state assessments, showed the most improvement?

8th grade Mathematics showed the greatest improvement. The greatest improvement was obtained between the Fall and Winter progress monitoring assessment window. A 22% gain for all students was obtained during this period. Economically disadvantaged scholars showed a 21% gain, students with disabilities showed a 15% gain and English language learners showed a 13% gain.

What were the contributing factors to this improvement? What new actions did your school take in this area?

8th grade teachers were the cohort of teachers with the greatest amount of experience. The experience these teachers brought from day one contributed to their ability to impact scholar learning from the start of the school year. Initiatives in Math and English Language Arts were implemented during the year. A schoolwide writing and literacy focus using RACE/S strategy was implemented. This strategy was implemented after a writing audit was conducted of scholar writing. The STAR Focus Skills report was utilized to provide targeted support for scholars including bell work targeted at the most missed standards. School interventionist provided push in and pull-out support. Progress monitoring data was monitored, and interventions provided based on this data.

What strategies will need to be implemented in order to accelerate learning?

To accelerate learning, the RACE/S strategy will be continued. Scholars are already familiar with this system. Module assessments will be implemented in all content areas. The module assessments will provide more frequent checks for mastery than the district quarterly assessments and STAR assessments. They will allow for a quicker response to scholars in the acceleration of learning. Our scholars responding positively to incentives. Science and Civics quarterly progress morning data showed increases when incentives were offered. We will implement more incentives throughout the year.

Based on the contributing factors and strategies identified to accelerate learning, describe the professional development opportunities that will be provided at the school to support teachers and leaders.

Professional development on building collaborative planning focusing on standards aligned instruction will be provided and monitored all year. Learning Sciences International strategies will be utilized throughout the school year to support standards aligned planning and instruction. We will provide professional development on classroom management, acceleration of scholar learning, and data analysis. Interventionist will support scholars and instructional coaches will support teachers. We will also provide scholars support on schoolwide expectations and rituals and routines.

Provide a description of the additional services that will be implemented to ensure sustainability of improvement in the next year and beyond.

The teacher engagement ambassador will provide support to new teachers. The ambassador provides academic support but also emotional support. New teachers can reach out to the ambassador for non-judgmental support. A purpose for this position is to support the retention of our new teachers. This also supports sustainability by keeping these teachers in the school for many years. The school-based leadership team will monitor all data collected and make changes to the system leading to the achievement of our goal and its sustainability.

Part III: Planning for Improvement

Areas of Focus:

#1. Instructional Practice specifically relating to Collaborative Planning

Area of Focus Description and Rationale:

The key component to all learning is a well-constructed lesson plan that is rigorous and aligned to the standards. Collaborative planning allows teachers the time and resources to design these lessons. A system for monitoring the creation and delivery of the developed lesson is essential. When rigorous and standards aligned lessons are designed and taught, scholars are motivated and intrigued to learn. School-wide data for the 2020-2021 school year shows that proficiency levels in ELA (25%), Math (23%), Science (20%), and Civics (48%) are below the District levels. Through a comprehensive collaborative planning focus, scholars will show gains across all curriculum areas.

Measurable Outcome:

Denison Middle School will increase learning gains by 15% on FSA for ELA 46% and Math 44% and increase proficiency by 5% for Civics 53% and acceleration 79% and increase Science proficiency to 33% through standards aligned instruction that is constructed through the collaborative planning process. Standards aligned instruction will be developed through collaborative lesson planning for teachers and delivered through collaborative student engagement activities for scholars. Instructional strategies will be modeled by instructional coaches and monitored by teachers through frequent checks for understanding and mastery of standards. We will decrease the disparity for all subgroups (African Americans, Students with Disabilities, Economically Disadvantaged, English Language Learners, and Hispanic) to close the achievement gap and improve equity

Monitoring:

A member of the administrative team is assigned to a content area and will attend planning sessions. Sign in sheets will be provided for each session and attendance monitored. The completed lesson plan will be monitored for standards-alignment and rigorous activities. Leadership will meet daily to discuss school status on meeting goals and provide support for teachers in need of assistance. Student work will be examined for mastery of the standard and rigor. Feedback will be provided for all staff and next steps for staff in need of assistance. Module assessments will monitor for scholar mastery.

Person responsible for monitoring outcome:

Terri Christian (terri.christian@polk-fl.net)

Evidence-based Strategy:

Learning Sciences International strategies will be utilized to achieve rigorous classroom instruction for all students. Evidence based strategies will be implemented through school-wide use of Smart 7 Strategy for reading comprehension, and RACES to guide writing short or extended responses to specific content inquiry.

Rationale for Evidence-based Strategy:

Learning Sciences International is built on Dr. Marzano's model of instruction that fosters essential teaching skills and strategies. These strategies are grounded in research conducted throughout the United States. These strategies will increase rigor for all within the classroom, leading to increased performance for subgroups and a more equitable learning environment.

Action Steps to Implement

- Design collaborative planning framework and structure it to include data analysis down to the scholar level, the incorporation of scholar engagement strategies, and checks for understanding.
- Support classroom instruction by providing after-school tutoring provided by teachers in core content areas.
- Provide scholar support through push-in and/or pull-out support by the Math interventionist and para professionals.

- Provide actionable feedback for all content area teachers through lesson planning, walkthroughs, and peer rigor walks.
- Develop a cohesive system for collecting and analyzing data to understand, address, and close the achievement gaps for ESSA subgroups.
- Use formative assessments to check for understanding and mastery, differentiation of instruction and acceleration.

Person Responsible Constance Smith (constance.smith@polk-fl.net)

- Help scholars interact with all content areas through the use of iPads and laptops (Gizmos, Achieve 3000, ImagineMath, etc)
- Introduce strategies during collaborative planning and/or PLC sessions to include rigorous and engaging instruction.
- Provide ongoing professional development for teachers on LSI strategies. Coaching supplies will be required.
- Provide professional development for content area teachers utilizing content specific software (Achieve 3000, Imagine Math, iCivics, etc.)
- Model instructional strategies and best practices to strengthen instructional delivery and scholar engagement.
- Support the development and implementation of a cohesive system for collecting and analyzing data to understand, address, and close the achievement gaps for ESSA subgroups.
- Support teachers in the use of formative assessments to check for understanding and mastery, differentiation of instruction and acceleration.
- Lead teachers in the review scholar work samples during collaborative planning.

Person Responsible Charlene Wilson (charlene.wilson@polk-fl.net)

- Help scholars interact with all content areas through the use of iPads and laptops (Gizmos, Achieve 3000, ImagineMath, etc)
- Introduce strategies during collaborative planning and/or PLC sessions to include rigorous and engaging instruction.
- Provide ongoing professional development for teachers on LSI strategies. Coaching supplies will be required.
- Provide professional development for content area teachers utilizing content specific software (Achieve 3000, Imagine Math, iCivics, etc.)
- Model instructional strategies and best practices to strengthen instructional delivery and scholar engagement.
- Support the development and implementation of a cohesive system for collecting and analyzing data to understand, address, and close the achievement gaps for ESSA subgroups.
- Support teachers in the use of formative assessments to check for understanding and mastery, differentiation of instruction and acceleration.
- Lead teachers in the review scholar work samples during collaborative planning.
- Support the implementation of the schoolwide book studies.

Person Responsible Mona Mills-Coleman (mona.millscoleman@polk-fl.net)

- Design collaborative planning framework and structure it to include data analysis down to the scholar level, the incorporation of scholar engagement strategies, and checks for understanding.
- Support classroom instruction by providing after-school tutoring provided by teachers in core content areas.
- Provide scholar support through push-in and/or pull-out support by the para professionals.
- Provide actionable feedback for all content area teachers through lesson planning, walkthroughs, and peer rigor walks.

- Develop a cohesive system for collecting and analyzing data to understand, address, and close the achievement gaps for ESSA subgroups.
- Use formative assessments to check for understanding and mastery, differentiation of instruction and acceleration.

Person Responsible Curtis Thomas (curtis.thomasjr@polk-fl.net)

- Help SWD process content by scheduling scholars in learning strategies focused content area support.
- Develop a cohesive system for collecting and analyzing data to understand and address, and close the achievement gaps for SWD.
- Provide support and professional development for teachers and staff for supporting SWD.

Person Responsible Niculina Howard (niculina.muscalu@polk-fl.net)

- Design collaborative planning framework and structure it to include data analysis down to the scholar level, the incorporation of scholar engagement strategies, and checks for understanding.
- Support classroom instruction by providing after-school tutoring provided by teachers in core content areas.
- Provide scholar support through push-in and/or pull-out support by the Reading interventionist and para professionals.
- Provide actionable feedback for all content area teachers through lesson planning, walkthroughs, and peer rigor walks.
- Develop a cohesive system for collecting and analyzing data to understand, address, and close the achievement gaps for ESSA subgroups.
- Use formative assessments to check for understanding and mastery, differentiation of instruction and acceleration.
- Purchase books to conduct a minimum of 3 schoolwide book studies during the year.

Person Responsible Travis Hinkley (travis.hinkley@polk-fl.net)

No description entered

Person Responsible [no one identified]

#2. Instructional Practice specifically relating to ELA

Area of Focus
Description and Rationale: A seven point decrease in ELA proficiency was noted for the 20-21 school year. Additionally, a 13 point decrease occurred in ELA Learning Gains for the same year. Reading is an essential life skill and is an area of critical need for this school year.

Measurable Outcome: Our school goal is to increase ELA proficiency to 37 from 25 and ELA Learning Gains for the BQ to 50 from 29 by the Spring FSA assessment through the integration of technology in ELA classrooms, push in and pull out support by interventionist, and the incorporation of novels and other text to promote student learning and achievement. We will decrease the disparity for all subgroups (African American, Students with Disabilities, Economically Disadvantaged, English Language Learners, and Hispanic) to close the achievement gap and improve equity.

Monitoring: A member of the administrative team is assigned to a content area and will attend planning sessions. Sign in sheets will be provided for each session and attendance monitored. Student data will be analyzed to identify the BQ25%. The interventionist will provide specific support for those in need of assistance. Student work will be examined for mastery of the standard and rigor. Module assessments will monitor for scholar mastery.

Person responsible for monitoring outcome: Travis Hinkley (travis.hinkley@polk-fl.net)

Evidence-based Strategy: Learning Sciences International strategies will be utilized to achieve rigorous classroom instruction for all students. Evidence based strategies will be implemented through school-wide use of Smart 7 Strategy for reading comprehension, and RACES to guide writing short or extended responses to specific content inquiry.

Rationale for Evidence-based Strategy: Learning Sciences International is built on Dr. Marzano's model of instruction that fosters essential teaching skills and strategies. These strategies are grounded in research conducted throughout the United States. These strategies will increase rigor for all within the classroom, leading to increased performance for subgroups and a more equitable learning environment.

Action Steps to Implement

Help students interact with ELA resources through the use of iPads and laptops (Gizmos, Achieve 3000, etc, AR)
 Support classroom instruction by providing after-school tutoring.
 Provide student support through push-in and/or pull out support by the interventionists.
 Purchase books to conduct a minimum of 4 schoolwide book studies during the year.

Person Responsible [no one identified]

Additional Schoolwide Improvement Priorities

Using the [SafeSchoolsforAlex.org](https://www.safeschoolsforalex.org), compare the discipline data of the school to discipline data across the state and provide primary or secondary areas of concern that the school will monitor during the upcoming school year. Include how the school culture and environment will be monitored through the lens of behavior or discipline data.

Denison Middle ranked in the high range for discipline incidents in the 19-20 school year compared to other middle schools in the state. Denison reported 6.2 incidents per 100 students compared to 4.2 reported for middle schools state wide. The primary focus this school year to decrease those numbers will be in the areas of physical altercations and negative behaviors between students and disruptive behaviors in the classroom. The first area of focus will be addressed by more staff presence in hallways during transition time and limiting the number of transitions students will have daily with a modified scheduling model. Staff members during class transition will be placed in areas of need and concern so there is a visible staff presence. Staff will inform Administration and Guidance immediately of any possible negative interactions between students, so those negative behaviors can be address through staff intervention, conflict resolution and parental support. The second area of focus will be addressed by classroom teachers receiving training in areas of classroom management procedures. Support from Administration will be provided through targeted classroom walk throughs with feedback and student and parent conferences. Teachers will also be able to setup parent conference through the guidance department to address ongoing issues and concerns.

Part IV: Positive Culture & Environment

A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning, and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups to employ school improvement strategies that impact the positive school culture and environment are critical. Stakeholder groups more proximal to the school include teachers, students, and families of students, volunteers, and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services, and business partners.

Stakeholders play a key role in school performance and addressing equity. Consulting various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies.

Describe how the school addresses building a positive school culture and environment.

The foundations of high quality learning environments set the conditions for a positive and healthy school culture and environment. At Denison we want to create the conditions for effective teaching and learning to occur. Students should feel safe and free to be involved. We want them to feel accepted. During the 2021-2022 school year, Denison Middle School will take action to build a positive school culture through activities to increase teacher and student attendance, promote a growth mindset, provide diverse learning experiences that bridge cultures, and build meaningful relationships.

A positive environment will lead to increased student and teacher attendance. This will be done by providing incentives for attendance through PBIS activities, and focusing on students with multiple EWS indicators.

A growth mindset will be fostered school-wide with the incorporation of resource materials by

Dweck. We want to instill school pride and self-respect with visuals posted around campus on bulletin boards, classrooms, etc. emphasizing the importance of a growth mindset. A comprehensive discipline plan will be developed and distributed. Staff will be trained by administrative staff on the plan and how to utilize it during the school year.

We will provide diverse learning experiences through culturally rich resource materials that engages students through multiple styles and means, at least three school-wide book studies, and festivals celebrating cultural heritage like Black History, Hispanic Heritage, Literacy Night, etc. These activities will include parents, the community, and our surrounding stakeholders.

We will support students in overcoming obstacles that impede their learning. Support staff assigned to the school will be utilized to provide specialized services when necessary. School based staff will be made aware of these resource people and how to refer students. We will have monthly activities that build morale among our staff. There has also been the addition of a staff member focused on teacher retention.

Identify the stakeholders and their role in promoting a positive culture and environment at the school.

A variety of stakeholders are consulted to promote a positive culture and environment. The School Advisory Committee reviews and provides approval of the School Improvement Plan. They also are consulted for strategies to promote a positive culture. Every year they support teachers and scholars.

Business partners will continue to be sought to support the mission and vision of the school, leading to a positive culture and environment. Their support has and continues to provide support to staff and scholars through needed supplies, rewards, and clothing and food banks.

A district community liaison supports the school by increasing positive exposure in the community and building connections in the surrounding community.

We are a member of the local chamber of commerce and actively participate on its education committee.

We will reach out to our scholars, parents and teachers for suggestions and feedback on building a positive culture and environment at the school. We will continue to host our annual cultural festival and provide additional opportunities for families to engage with our school.

Part V: Budget

The approved budget does not reflect any amendments submitted for this project.

1	III.A.	Areas of Focus: Instructional Practice: Collaborative Planning				\$67,722.82
