Demographics

Principal: Kathryn Lott C

Start Date for this Principal: 7/12/2022

2019-20 Status (per MSID File)	Active
School Type and Grades Served (per MSID File)	Elementary School KG-6
Primary Service Type (per MSID File)	K-12 General Education
2021-22 Title I School	No
2021-22 Economically Disadvantaged (FRL) Rate (as reported on Survey 3)	12%
2021-22 ESSA Subgroups Represented (subgroups with 10 or more students) (subgroups below the federal threshold are identified with an asterisk)	Students With Disabilities Asian Students Hispanic Students Multiracial Students White Students Economically Disadvantaged Students
School Grades History	2021-22: A (82%) 2018-19: A (84%) 2017-18: A (90%)
2019-20 School Improvement (SI) Information*	
SI Region	Southeast
Regional Executive Director	LaShawn Russ-Porterfield
Turnaround Option/Cycle	N/A
Year	
Support Tier	
ESSA Status	N/A
* As defined under Rule 6A-1.099811, Florida Administrative Code. For more information, click here .	

School Board Approval

This plan is pending approval by the Brevard County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a "living document" by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the "Date Modified" listed in the footer.

Part I: School Information

School Mission and Vision

Provide the school's mission statement.

To continue the International Baccalaureate Primary Years Programme, a concept based curriculum that empowers students to become inquirers who are responsible, globally-minded citizens and reflective lifelong learners.

(Reviewed 9/2019)

(Reviewed 9/2020)

(Reviewed 8/2021)

(Reviewed 8/2022)

Provide the school's vision statement.

Freedom 7 Elementary School of International Studies, an International Baccalaureate Primary Years Programme School, provides a quality public education with a rigorous and relevant transdisciplinary curriculum. Students are encouraged to become critical and open-minded thinkers, lifelong learners and compassionate world citizens who respect cultural diversity and take action to better our world.

School Leadership Team

Membership

For each member of the school leadership team, select the employee name and email address from the dropdown. Identify the position title and job duties/responsibilities.:

Name	Position Title	Job Duties and Responsibilities
Lott, Kathryn	Principal	
Noe, Jennifer	Instructional Coach	The instructional coach is a member of the leadership team that supports all teachers as a coach of different disciplines and the implementation of the IBPYP. She assists in student assessment and serves as the lead mentor for the school. Mrs. Noe participates in each of the grade level and enrichment team's 80 minute PLCs.
DeLeon, Yesenia	Assistant Principal	The Assistant Principal assists teachers with instructional support and coordinates the mentor program throughout the school. She oversees the MTSS process and coordinates additional supports for differentiation. She is responsible for supporting growth and development of the IBPYP and collaborates with the principal on discipline. The Assistant Principal participates in grade level 80 minute weekly PLCs and coordinates committees and clubs.

Demographic Information

Principal start date

Tuesday 7/12/2022, Kathryn Lott C

Number of teachers with a 2022 3-year aggregate or a 1-year Algebra state VAM rating of Highly Effective. *Note: For UniSIG Supplemental Teacher Allocation, teachers must have at least 10 student assessments.*

3

Part III: Planning for Improvement

Data Analysis

Answer the following analysis questions using the progress monitoring data and state assessment data, if applicable.

What trends emerge across grade levels, subgroups and core content areas?

Science has been an area of focus since we had several years of downward trends. In 2022, our science scores went from 81% proficiency in science to 88% proficiency in science. Although this is an improvement over last year, we are still not at the level we know our students can perform. In 2019 89% of the students were proficient. In 2018 91% of the students were proficient.

Learning gains in reading and in math do not match proficiency levels. For the 2021-2022 school year, in ELA, 68% of the students had learning gains where as 89% of the students were proficient. In mathematics, 81% had learning gains with 92% proficient. Learning gains for the lowest 25% in mathematics were 87%. The discrepancy has led to continued conversations as to why and a deeper dive into who our students are that are not making the gains.

What data components, based off progress monitoring and 2022 state assessments, demonstrate the greatest need for improvement?

The learning gains, specifically in ELA, demonstrate a need for improvement. The past two years, we have these percentages hover in the 60% range in ELA. This dropped again in ELA this past year, from 75% to 68% in ELA.

Equally unsatisfactory, are the learning gains for the lowest 25% in both areas; ELA 67%, mathematics 87%.

According to iReady final diagnostic information from the 2021-2022 school year, annual typical growth was represented as follows: 3rd grade went from 70% to 60%, 4th grade went from 69% to 53%, 5th grade went from 68% to 51%, and kindergarten went from 28% to 21%.

In 2021, 81% of the fifth grade students were at proficiency in science but we DID see an increase in 2022 to 88% This will remain an area of focus being it is a drop in performance compared to previous years. In 2019 89% of the students were proficient. In 2018 91% of the students were proficient.

What were the contributing factors to this need for improvement? What new actions would need to be taken to address this need for improvement?

While Freedom 7 showed overall increases in mathematic achievement, our ELA dropped in all areas related to our school grade. We believe that we are still facing some challenges related to being 100% hybrid during 2021 and dealing with the difficulties with student understanding and engagement. Beginning in 2022 when all students returned, we have returned to more engaged small group instruction and focus. Incorporating new reading and math along with the IB units of inquiry also takes much planning and adjusting formative and summative assessments.

Analysis of standards aligned, conceptually connected curriculum will need to be conducted to ensure that gaps are closed within the units of instruction. Systematic analysis and implementation of strategies to support students in all grades will support growth, especially in the area of differentiated instruction.

What data components, based off progress monitoring and 2022 state assessments, showed the most improvement?

End of year diagnostic data shows a drop from 90% on grade level to 86% on grade level in the area of vocabulary. This is still our lowest domain with comprehension of literature and information text being second. We will continue working to include complex text into out units of inquiry and strengthen our approaches to learning skills.

Proficiency levels according to FSA in ELA were at 88%, second in the district and 30% higher than the district average.

What were the contributing factors to this improvement? What new actions did your school take in this area?

Schoolwide, systematic conversations, professional development and strategies were conducted during the 2021-2022 school year. Practices shifted to include word work, vocabulary word walls, increased use of morphology and student agency within classrooms to support growth. We also had an additional focus on small group instruction in math for both lower quartile students and high performing students.

What strategies will need to be implemented in order to accelerate learning?

Embedded professional development though coaching, shared articles within the Weekly Soarin and dialogue through the MTSS process will support acceleration. The collaborative expectation that small group instruction is occurring will be discussed in PLCs and through other learning opportunities throughout the year. In addition, administrative observations of small group instruction will foster ongoing conversation of best practices to support tier 2 and tier 3 learners. Our 3rd grade team will participate in

math acceleration with a few other BPS schools.

Teachers will be providing differentiated instruction through the units of inquiry using district provided standards-aligned resources. The use of Benchmark Advance's enrichment items will be explored to support differentiated instruction within tier 1 instruction. In addition, these resources will be explored within the gifted student program to support those learners.

Based on the contributing factors and strategies identified to accelerate learning, describe the professional development opportunities that will be provided at the school to support teachers and leaders.

Articles that support the philosophy of accelerating learning will be provided and discussed in PLCs and in faculty and MTSS meetings. Teachers will become familiar with the resources continued within the MTSS app, the digital MTSS shared documents to track progress, and use these materials more systematically within their tier 2 and tier 3 groups. Training specifically on explicit instruction and differentiation with our instructional coach will be part of our PD days.

An inquiry into Conscious Discipline will be conducted throughout the school year by all teachers to support growth in belonging and foster positive relationships with all stakeholders in order to systematically accomplish the school improvement plan and to prepare for continued development with the IBPYP as we work through our self-study evaluation year.

Provide a description of the additional services that will be implemented to ensure sustainability of improvement in the next year and beyond.

The use of Conscious Discipline strategies will be used to elevate the Learner Profile attributes and approaches to learning and teaching within the building. This practice and growth will support an increase in relationships throughout the school in order to continue to build capacity of successful differentiated learning across the school.

Areas of Focus

Identify the key Areas of Focus to address your school's highest priorities based on any/all relevant data sources.

:

#1. Instructional Practice specifically relating to ELA

Area of Focus Description and Rationale:
Include a rationale that explains how it was identified as a critical need from the data reviewed.

The results of the iReady data for progress monitoring 3- EOY 2022, continues to indicate an area of potential growth in vocabulary proficiency across all grades. Previous year's School Improvement Plan documented a need to support growth in this area and we saw growth from the beginning of last year to the beginning of this year, 2020-21. We would like to continue to work on gains as seen in assessment data and would like to continue to improve proficiency, while supporting our new ELA B.E.S.T standards, in vocabulary acquisition.

The growth in kindergarten to grade 3 was significant. By continuing to focus on vocabulary acquisition, morphology and tier 3 vocabulary, students in grades 4 through 6 will also see gains.

Measurable Outcome:
State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

Goal for 2022-2023 MEASURABLE OUTCOME based on iReady scores in the vocabulary domain.

6th Grade: 81% to 86%
5th Grade: 82% to 87%
4th Grade: 87% to 92%
3rd Grade: 98% to 100%
2nd Grade: 92% to 97%
1st Grade: 94% to 99%

Goal for 22-23 MEASURABLE OUTCOME based on STAR and FAST students scoring at/above proficiency by EOY

3rd- 6th Grade: 83%-95%
2nd Grade: 98%-100%
1st Grade: 95%-100%
Kdg- 90% to 95%

Monitoring:
Describe how this Area of Focus will be monitored for the desired outcome.

iReady diagnostic assessments and ongoing progress monitoring of the iReady instructional path use will be discussed and reflected upon in PLCs and Leadership Team meetings. In addition, observations by administrators will include conversations about how vocabulary instruction is being supported.

Person responsible for monitoring outcome:

Jennifer Noe (noe.jennifer@brevardschools.org)

Evidence-based Strategy:

Describe the evidence-based strategy being implemented for this Area of Focus.

School-wide support with explicit vocabulary instruction across all subject areas using a variety of complex texts will support continued vocabulary growth for all students. Attention to the morphology timeline will be provided so that all grade level appropriate prefixes/suffixes are taught and not repeated.

Rationale for Evidence-based Strategy:
Explain the rationale for

Having explicit conversations in PLC's regarding vocabulary development, professional development support, and vertical conversations has supported observed learning engagements in this area from last year to this year. We would like to continue to support learners by broadening our knowledge in teaching and learning

selecting this specific strategy. Describe the resources/criteria used for selecting this strategy.

of best strategies in vocabulary development in context including implementation of BEST E.L.A. vocabulary standards, to continue to make gains.

Action Steps to Implement

List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

Purposeful conversations regarding explicit vocabulary teaching during PLCs and vertical team meetings guided by the instructional coach. Teachers will document learning experiences within each unit of inquiry, including a relevant vocabulary list to be shared and connected through enrichment.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

Provide professional development to teachers regarding vocabulary strategies to all grade levels and enrichment staff.

Person Responsible [no one identified]

Code learning engagements within the units of inquiry, incorporating the ELA B.E.S.T. standards, that have explicit opportunities for vocabulary development and monitor impacts through formative assessments. Develop vocabulary lists for each unit of inquiry, to support the Enrichment teachers.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

Data will be analyzed after each diagnostic through MTSS process to foster vertical and horizontal discourse among teachers.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

Walkthroughs by leadership team will provide ongoing support to teachers in vocabulary instruction. Walk through "look fors" will be collaboratively created based on SIP goals, IBPYP action plans and individual grade level goals.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

The Elementary Leading and Learning Instructional Agreements will be shared with all teachers during a faculty meeting. Teachers will be provided time to reflect and analyze their growth and successes with the agreements.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

Teachers and the gifted student program teacher will explore the use of enrichment activities from Benchmark Advance to support differentiated instruction.

Person Responsible Christine Tarver (tarver.christine@brevardschools.org)

#2. Instructional Practice specifically relating to Math

Area of Focus
Description and Rationale:
 Include a rationale that explains how it was identified as a critical need from the data reviewed.

While proficiency in mathematics is 92% according to FSA data in 2021-2022 school year, learning gains were 81% and of the lowest 25%, 87% of the students made gains. This was an area of growth for use compared to last year but still an area we will continue to focus on. In order to support greater growth, a focus on differentiated instruction will provide a focus to support growth of all students. In addition, increasing agency among all students through student data tracking in both goal setting and reflection, will support growth in student learning gains.

Measurable Outcome:
 State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

Learning gains in mathematics will increase from 81% to 85% on the FAST. Learning gains in mathematics of the lowest 25% will increase from 87% to 90%. This will result in an increase in proficiency from 92% to 95%.
 Due to change of assessments, it will be difficult to predict which outcomes to measure.***

Monitoring:
 Describe how this Area of Focus will be monitored for the desired outcome.

Teachers will monitor and bring forward ReVeal and EdGems data points to MTSS meetings to support small grouping needs. iReady diagnostic assessments will be analyzed and reflected upon through MTSS.

Person responsible for monitoring outcome:

Yesenia DeLeon (deleon.yesenia@brevardschools.org)

Evidence-based Strategy:
 Describe the evidence-based strategy being implemented for this Area of Focus.

In order to support growth in mathematics, students need differentiated instruction. Acceleration and remediation of skills should be supported while also providing quality, standards aligned, on grade level instruction. Newly adopted standards aligned resources will support this growth. To further foster growth, a differentiated approach should be established so that learning gains are achieved. Whether teachers differentiate content, process, products, or the learning environment, coupled with ongoing assessments is a successful strategy.

Ongoing progress monitoring will support reflective learning and teaching of the conceptual understandings of mathematics.

In addition, building student agency through the reflective goal setting perspective and data chats will also support student growth. Children who have ownership, voice and choice in their decision making, will be successful.

Rationale for Evidence-based Strategy:
 Explain the rationale for

We know that differentiation means tailoring instruction to meet individual needs. Whether teachers differentiate content, process, products, or the learning environment, coupled with ongoing assessment is a successful strategy. The work of Tomlinson and Wormelli helps to guide our development in this area.

selecting this specific strategy. Describe the resources/ criteria used for selecting this strategy.

Student agency, as conceptualized by Bandura's social cognitive theory, allows students to take part in their own self-development. This in turn helps to build community and a sense of belonging and ultimately have an awareness of others. A student's self-efficacy will determine success in decision making and therefore will support the skills needed to acquire, make meaning and transfer learning into a variety of contexts.

Action Steps to Implement

List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

Utilize the ReVeal and EdGems assessments in the MTSS process to support tier 2 and tier 3 instructional planning. Reflect on instructional and monitor groups through MTSS meetings.

Person Responsible

Jennifer Noe (noe.jennifer@brevardschools.org)

Provide professional development with differentiated instruction from the district provided math coach from the district on an early release PDD and through directed discourse with in PLCs during the first semester.

Person Responsible

Lisa Enrique (enrique.lisa@brevardschools.org)

Walkthroughs by leadership team will provide ongoing support to teachers in differentiated instruction. Walk through "look fors" will be collaboratively created based on SIP goals, IBPYP action plans and individual grade level goals.

Person Responsible

Yesenia DeLeon (deleon.yesenia@brevardschools.org)

Agency will be increased through the use of data notebooks, student led-conferences and the learning reflection cycle. Teachers will be provided with professional development through faculty meetings and PLCs to support growth in increasing student agency. Students will be able to articulate learning goals in mathematics.

Person Responsible

Jennifer Noe (noe.jennifer@brevardschools.org)

The Elementary Leading and Learning Instructional Agreements will be shared with all teachers during a faculty meeting. Teachers will be provided time to reflect and analyze their growth and successes with the agreements.

Person Responsible

Yesenia DeLeon (deleon.yesenia@brevardschools.org)

#3. Instructional Practice specifically relating to Science**Area of Focus****Description and Rationale:**

Include a rationale that explains how it was identified as a critical need from the data reviewed.

There has been a downward trend in FCAT Science scores over the past three iterations of the assessment.

In 2018, proficiency was 91%. In 2019, proficiency was 89%. In 2021, proficiency was 81%. The gap year represents the start of the pandemic and a shift to distance learning for March-June 2020 and a large population of eLearners for the 2020-2021 school year.

Measurable Outcome:

State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

Proficiency will increase on the Florida Standards NGSSS Science assessment from 81% to 89%.

Monitoring: Describe how this Area of Focus will be monitored for the desired outcome.

5th grade teachers will monitor student understanding using the district provided standards-aligned assessments throughout the year. Teachers will increase student agency with students' own tracking of data through goal setting and reflection. Discourse within PLCs, in all grades, will support student growth in science.

Person responsible for monitoring outcome:

[no one identified]

Evidence-based**Strategy:**

Describe the evidence-based strategy being implemented for this Area of Focus.

Students will engage in increased hands-on, inquiry based lessons to increase conceptual understanding. Using tools like the 5E model, PENDAs and the science fair process will support positive student engagement and transfer of knowledge.

Rationale for Evidence-based**Strategy:**

Explain the rationale for selecting this specific strategy. Describe the resources/criteria used for selecting this strategy.

We believe student engagement with inquiry will lead to great understanding of scientific concepts. Students have lacked the opportunity to have hands-on experiences with science concepts during the pandemic and therefore need the opportunity to do so within the contexts of the units of inquiry to make connections. In addition, differentiation will be offered through the PENDA application with students in grades 3-6.

Action Steps to Implement

List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

The science lab will be re-organized so that functionality is increased to support student learning within the space. Collaboration with science parent educators will support co-creation of lessons to provide rich, standards aligned, conceptually based learning engagements for students within the space.

Person Responsible

Yesenia DeLeon (deleon.yesenia@brevardschools.org)

A Science Club will be held March-April 2022 with Mrs. Tarver and more participants (to be announced), inviting the lowest 25% of 5th grade to participate after school to build their conceptual knowledge of the most difficult Grade 5 Florida Standards NGSSS Science topics, we will use test item spec's and years past data to identify problematic areas to focus hands-on labs to provide students with relevant context before taking the assessment.

Person Responsible Christine Tarver (tarver.christine@brevardschools.org)

5th grade teachers in collaboration with the leadership team will disaggregate data from NGSSS science 2022, SAT 10 science data 2022 and the first district science assessment to determine gaps. The 5th grade teachers will then lead an early release PDD whereby the process of identifying, elevating and aligning embedded science standards within the units of inquiry, is conducted with all grade levels. This work will continue through PLCs and be supported by the leadership team.

Person Responsible Yesenia DeLeon (deleon.yesenia@brevardschools.org)

Vertical conversations will be held regarding science concepts and the programme of inquiry to ensure that all conceptual ideas are explored within the units of inquiry. Discourse will also involve how the concepts are assessed and may lead to assessments shifting. These will take place during faculty meeting time.

Person Responsible Jennifer Noe (noe.jennifer@brevardschools.org)

Implementation of the district science standards assessments through the units of inquiry will be conducted by grades 2-5.

Person Responsible Yesenia DeLeon (deleon.yesenia@brevardschools.org)

Implementation of PENDA science in grades 3-6 by all classroom teachers. Reflection and analysis of data will be conducted through PLCs.

Person Responsible Kathryn Lott (lott.kathryn@brevardschools.org)

#4. Positive Culture and Environment specifically relating to Social Emotional Learning

Area of Focus
Description and Rationale:
Include a rationale that explains how it was identified as a critical need from the data reviewed.

According to the Youth Truth survey in 2021, our students feel that while the strengths at Freedom 7 are relationships and culture, our weaknesses lie in the sense of belonging and academic challenge. Conversely, academic opportunity was the highest rated by teachers at 8.6.

93% of the families responded that they feel welcome at the school, which was a great challenge given the pandemic and limitations with people on campus. Many feel that the academic challenge is why they select the school.

This dichotomy in perspectives, coupled with the increase over the past three years in relationships and culture according to Youth Truth, has led us to want to determine how we are engaging students and challenging them academically. In addition, the sense of belonging is an area that through a variety of social emotional supports, we will increase.

Measurable Outcome:
State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

Student perception of a sense of belonging, according to the Youth Truth survey will increase from 2.61 to 2.71. In addition, academic challenge will increase from 2.52 to 2.62.

Monitoring:
Describe how this Area of Focus will be monitored for the desired outcome.

Students will be surveyed two additional times during the first semester using an in house survey to determine areas of growth. Results will be analyzed and reflected upon by all faculty and the leadership team during faculty meetings and/or PLCs.

Person responsible for monitoring outcome:

Kathryn Lott (lott.kathryn@brevardschools.org)

Evidence-based Strategy:
Describe the evidence-based strategy being implemented for this Area of Focus.

Increasing student agency throughout the school will support not only a greater understanding of the academic challenge, but provide a sense of belonging as the opportunity for self-reflection and goal setting with support increases academic proficiency. This will also support growth in learning gains as students develop increasing ownership in their own learning.

Rationale for Evidence-based Strategy:
Explain the rationale for selecting this specific strategy.

According to From Principals into Practice (2020), Efficacy refers to an individual's belief in their "capabilities to organize and execute the courses of action required to produce given attainments" (Bandura 1997). This belief is integrally connected to agency because the stronger the sense of self-efficacy, the greater likelihood that the individual will exercise agency (Bandura 1997). Self-efficacy influences the choices students are confident in making, which, in turn, influences the degree of ownership and impact they have in their lives.

Describe the

resources/criteria used for selecting this strategy. We know that when we are empowered and agents of our own learning (both adults and students) that decisions are made, questions are asked and understandings are communicated.

Action Steps to Implement

List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

Teachers will define rigor and relevance for excellence through the lens of assessment, homework, assignments and organization. They will identify behaviors vertically across grade levels and disciplines to begin to articulate how agency is built within these contexts. The leadership team will support this process with text to anchor the conversations, connected to the IBPYP philosophy and pull forward the discourse through PLCs.

Person**Responsible**

Kathryn Lott (lott.kathryn@brevardschools.org)

Teachers will be trained in Conscious Discipline throughout the year in faculty meetings and PLCs. They will implement strategies that support growth and connections with the Learner Profile attributes. Teachers will be able to observe other teachers as needed to help guide their own personal reflections and connections. Teachers will be encouraged to share with their colleagues through the Sharing Soarin Success professional development opportunity.

Person**Responsible**

Kathryn Lott (lott.kathryn@brevardschools.org)

Students will create videos to share with other students the approaches to learning, learner profile attributes and other concepts to support a collaborative learning culture.

Person**Responsible**

Jennifer Noe (noe.jennifer@brevardschools.org)

The guidance counselor will support students' social emotional growth through formal lessons, support and behavior groups and formal lessons using district supported curriculum.

Person**Responsible**

Lisa Enrique (enrique.lisa@brevardschools.org)

Teachers will engage in professional development whereby From Principals into Practice and other resources from the IB, will be used to support growth in developing learner agency. The leadership team will reflect on the implementation and provide support as necessary.

Person**Responsible**

Kathryn Lott (lott.kathryn@brevardschools.org)

A Native Language/Home Language survey will be sent home to families to gather information about the children's written and spoken languages at home. This information will be used by the leadership team, language teachers and student groups (AACT, World Language Club, World Geography Club) to elevate the languages and cultures represented in the school.

Person**Responsible**

Jennifer Noe (noe.jennifer@brevardschools.org)

Positive Culture & Environment

A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies that impact the school culture and environment. Stakeholder groups more proximal to the school include teachers, students and families of students, volunteers and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services and business partners.

Describe how the school addresses building a positive school culture and environment.

The community at Freedom 7 is unique in that as a school of choice, our community has the opportunity to be comprised of families from the entire Brevard County. The requirement of twenty volunteer hours per family is essential to not only the philosophy of education at the school, but the success of all of the students. Freedom 7 Elementary typically registers over 10,000 volunteer hours each year, however, we did not quite meet that goal. Last year our final hour count was just over 7,053. We hope to surpass 10,00 again this year.

The nature of belonging to a larger International Baccalaureate community provides extensive feedback opportunities. As a member of the Florida League of IB Schools and through continued work with the IB, stakeholders at Freedom 7 are able to participate in continuous learning with like-minded schools from around the state and globally.

Survey data from parents indicates 98.5% of our families feel welcome at school and that 77% of our families feel they have the opportunity to provide input. This increased slightly from 71% and now with face to face school-wide events we hope to see this continue to increase.

According to the insight survey, 100% of the teachers feel feedback is sought and valued within the school house, as compared to 95% of the year prior. Overall, according to the insight survey, teachers ranked Freedom 7 high in the area of academic opportunity and peer culture. Areas of opportunity are academic expectations and academic opportunity. The administration team will be increasing support in these areas by conducting support meetings during the first few weeks of school to gain input and insight into teachers' goals and needs. In addition, a Google Survey was sent during pre-planning to obtain a variety of information to guide growth overall at Freedom 7.

According to the Youth Truth Survey, relationships and engagement were highly ranked, while academic challenge and belonging were lowest. The increased engagement with Conscious Discipline will support all students with an increased sense of belonging within the Freedom 7 Elementary context. We will continue to discuss further, with grade level groups, individual data throughout the 2021-2022 school year. Continued efforts through the student organization, AACT, will help to ensure student voice and choice are part of the ongoing discourse at Freedom 7.

Identify the stakeholders and their role in promoting a positive school culture and environment.

The Freedom 7 Community recognizes all of the stakeholders in decisions making and reflection including students, faculty, community members and families. Through formal structures such as SAC, faculty meeting, Threat Assessment Team, committee meetings and the Action Ambassador Committee Team (AACT) and more, participants are provided opportunities to share input, question decisions, reflect and

take leadership roles in the organization. The parent organization, Ayudar Parents and Teachers (APT), plays an essential role in the decision making at Freedom 7. 100% of the families participate in the organization in a variety of ways. Anecdotal, informal feedback on social media, emails and through discourse with all stakeholders is ongoing, organized and supportive of a continued growth mindset at Freedom 7 Elementary.

As a result of input from the SAC, "Sip Tips" will continue to be shared through the newsletter, website and on social media in order to build capacity of all stakeholders. New this year, will be videos of students sharing how they are connected to the growth and development of the collective goals represented in the SIP.

As an International Baccalaureate school, we belong to a large community of IB schools around the world and network with them in different forms. In addition, as a member of the Florida League of IB Schools, whereby the our IB Coordinator, serves as the IB PYP Secretary. Freedom 7 maintains interconnected networks to help us grow and develop our school community.

Our social media platform includes leadership team, all teachers' websites, APT's website and social media platforms and more. In addition, Mrs. Noe shares articles of student learning and service learning with various publications within the county. In addition, the Principal regularly joins the Kiwanis Club to network and share programs and learning from the school with the community.

Engaging ALL Stakeholders

- The school engages families, students, and all faculty in a shared understanding of academic and behavioral expectations as well as high-quality instruction.
- Teachers communicate high expectations for all students (e.g., "All students are college material"). Teachers meet in PLCs weekly to routinely examine disaggregated data to look for themes/patterns among student groups. This data and the following, discipline referrals or incident reports, in and out-of-school suspension and attendance also forms the basis for discussions of what's working (or not) for particular groups within a school and What needs to be done. The school provides orientation for new teachers and ongoing support from a mentor teacher. Teachers establish and practice clear expectations and classroom procedures, and provide frequent feedback to students, and encourage students to be caring and respectful to one another and teachers model such interactions in the classroom. The schools, curriculum and teachers' lesson plans draw on the diverse interests and experiences of students.
- Leaders demonstrate how those beliefs manifest in the school building. For example:
- Collaborative planning is solutions-oriented and based in disaggregated data
- Student work is displayed throughout school
- All students are enrolled in college- and career-ready prep curriculum . The administration ensures that teachers have resources, training, and ongoing support to meet them and provides frequent, constructive feedback, and, actively make themselves available to teachers and staff. The leadership team actively solicit staff feedback on school-wide procedures and create opportunities for teachers to assume leadership roles. They also structure the master schedule to include collaborative planning and ensure it is rooted in data on student progress and interests.

SAC - The school has established an infrastructure to support family engagement, such as a decision-making SAC council. It reaches out to families and the community early and often - not just when there is an issue. Seeking input from families on how the school can support students, and follow up with what's being done as a result. We also ensure that logistics of parent/teacher conferences and other school events enable all parents to participate (schedule to accommodate varied work hours, offer translation, and provide food and childcare). It is a priority for the school to intentionally engage

with families of historically under-served students (e.g., by providing opportunities for small-group conversations with school leaders).
